INTRODUCTION.

THE general utility of a work of this description not only to those who may have but a limited knowledge in the science of numbers, or be totally ignorant of it, but even to the most skilful arithmeticians, requires but little argument to demonstrate.—The convenience and welfare of an individual, in the present state of society, do not so imperatively demand an acquaintance with any one specific science, as with Arithmetic, inasmuch as there are few, if any situations in which he can be placed, whose duties can be effectively discharged without its assistance. Correctness in calculations is indispensably necessary to ensure prosperity in all commercial pursuits, and in other lines, where the qualification is less in request, it may obviously be productive of the greatest degree of benefit, by detecting imposition, and protecting property from depredation. Let an individual move in whatever sphere of life he may, he has continual occasion to revert to this science, and though he may be fully competent to avail himself of its benefits, yet the variety and importance of other occupations, may leave him without the leisure to perform its necessary operations, and therefore, such an Assistant as he is now presented with, must, it is presumed, be peculiarly acceptable, as at once economizing time and labour, and precluding that loss, which might accrue from trusting to the erroneous or impositious calculations of others. To Merchants and Tradesmen, it is almost superfluous to offer a single remark in elucidation of its utility: they have obviously but little time to spare, and a reference to the columns of this

book, must eminently tend to curtail the time and labour consumed in their multifarious transactions. The Editor also cannot refrain from particularly adverting to the advantage which may be derived from the work by those, on whom Providence has not bestowed the benefits of arithmetical education — For such persons may by the mere knowledge of the figures only ascertain the result of the most difficult operation. This compilation may also be useful as a test or proof of arithmetical operations, which individuals may themselves chuse to work. It may likewise be farther observed, that by furnishing questions and results it is peculiarly adapted for the use of schools, and private teachers, as well as for individuals in general in every rank or station of life.

The very flattering reception which the first edition of this work has met with from the public, and the continued and encreasing demands for it, have tended in no inconsiderable degree to encourage the author to spare neither pains nor trouble to render this (second) edition of more extensive utility; and he should be unpardonably wanting in sensibility and gratitude were he to omit availing himself of this opportunity of expressing his acknowledgments for the very liberal patronage with which it has been already honoured.

The following explanatory notices will, it is hoped, enable the reader completely to comprehend and make use of the Tables comprised in the body of the work.

TABLE I.

Contains the value of any quantity of Goods or Wares, from number 1 to 10,000, at the rate of from 1 Pie to 100 Rupees each. To use this Table, observe the following rule, viz.

If the value of 30 cubits of Bastia be demanded at 2 Annas per cubit, look for the number 30, in page 4, column the 1st, and opposite to that number in column the 2d, you will find 3 Rs. 12 As. the answer required.

TABLE II.

Contains the value of any Commodity in gross weight, from 2 Annas to 100 Rupees per maund, and from 1 seer to 1 maund. For using this Table, observe the following rule:—

If the price of 27 seers of fine Benares Sugar be demanded at 11 Rupees per maund, look for the number 27 in page 36, column the 1st, and opposite to that number in column the 4th, you will find 7 Rs. 6 As. 9-3 Pies, the answer required.

TABLE III.

Contains the value of any Commodity, from 1 chattack to 1 maund, at the rate of from 1 Anna to 10 Rupees per seer. For using this Table, observe the following rule:—

If the price of 15 seers of Wax Candles be required at 2 Rs. per seer, look for the number 15 in page 63, column the 1st, and opposite to that number in column the 2d, you will find 30, the answer required.

N. B.—By the use of the three foregoing Tables, the buyers and sellers of commodities will, obviously, be exempted from many necessary and burthensome calculations.

TABLE IV.

Contains the Interest of any sum of money, from 100,000 Rupees to 1 Pie, from 1 to 30 days, and from 1 to 12 months, at the rate of from 4 to 12 per cent.

For using this Table, suppose it be required to know the Interest of 599 12 3 for 5 months at 9 per cent. per annum, reference must be made to page 186.

	12				5 400
		3				1 350
<hr/>						
Principal SaRs	599	12	3	Interest SaRs	22	7 11,550

TABLE V.

Contains the Commission of any sum of money, from 100,000 Rupees to 1 Pie, at the rate of from $\frac{1}{4}$ to 10 per cent.

TABLE VI.

Contains the Calculations of Batta, from 1 to 16 per cent. upon any sum, from 100,000 Rupees to 1 Pie, and from thence may be ascertained the equivalent sum in Current Rupees, of any given number of Arcot, Sonaut, or Sicca Rupees, according to the respective Batta that they bear.

By way of example, in the use of this table, suppose it be required to determine how many Current Rupees are in the sum of Sicca Rupees 5550 12 6, Sicca Rupees bear 16 per cent. batta, reference must be had to page 280, and in the first column will be found the 16 per cent Rupees.

6	960		6 960
<hr/>			
Sa.Rs. 5550 12 6	888 2 ..	6433 11 6	

TABLE VII.

Appertains to the subject of Exchange, and contains Current Rupees rendered into Rupees of different values, from 1 to 16 per cent.—This table will be found extremely useful in purchases and sales, when it is often stipulated that the value of commodities shall be paid in particular species of Rupees bearing a fixed batta; and, as the established coin is Sicca Rupees, which is sixteen per cent. superior to the current. It may be proper to remark here (tho' it cannot be very necessary, it being so well understood), that the difference between any kind of Rupee and the Current, is always calculated in currency, so that altho' 16 per cent. Rs. are 8 per cent. better than those which are 8 per cent. above currency, yet one hundred 16 per cent. Rs. are not equal to one hundred and eight 8 per cent. Rupees, but to one hundred 8 per cent. Rupees, increased by the addition of eight Current Rupees reduced to that centage; that is, Rupees 766 making the sum of 8 per cent.—Rupees 107 6 6 the equivalent to one hundred 16 per cent. Rupees; and vice versa, one hundred 8 per cent. Rupees, because 8 per cent. less in value than the 16 per cent. Rupees do not equal 92 of that sort; but 100 lessened by the reduction of 8 Ct. Rs. reduced to value in that centage, viz. Rs. 6 14 4, making the sum 93 1 8 sixteen per cent. Rupees; and so of all the other kinds. By way of example under this table, suppose Current Rupees 25355 12 are to be paid in Sicca, or 16 per cent. Rupees, in page 268.

	Cur. Rs.		S. Rs.	D. Ps.

Current Rs.	25355 5 12	Equivalent S. Rs.	21858	6 5 703 3

Or, if that sum, or any other Current is to be paid in Arcot, or Sonauts, reference must be made in the same way to the pages containing the 8 per cent. and 11 per cent. calculations, and so with all others.

TABLE VIII.

Exhibits the equivalent sum in any species of Rupees, for any number of Gold Mohurs, from 10,000 to 1, valuing the Gold Mohur at 16 best Sicca Rupees, at 16 per cent. above currency. It also shews the comparative value of different species of Rupees with each other. By way of example suppose the value of 1258 Gold Mohurs is required in Rupees which are 13 per cent. above currency—Turn to page 289, and in the second column will be found the 13 per cent. Rupees.

	G. M.				13 per cent. Rs.

	<u>1258</u>				<u>20662 6 0</u>
Gold Mohurs	1258			Equivalent Rs.	20662 6 0

TABLES IX. X. XI. X.*

Exhibit the equivalent value, to and with each other of Sicca, Current, Sonaut, and Arcot Rupees, which are the common coins of Bengal, from 100,000 Rupees to 1 Pie.—Their comparative values have been also ascertained by the Tables of Batta. To use these Tables, let it be supposed that Sicca Rupees 10330 4 2 are to be paid in Sonauts, refer to pages 291 and 292.

Sicca Rs.	10330 4 2		Equiv. Sonauts	10795 9 4		792 83

TABLE XI*.

Contains the Exchange of Rupees into Dollars, from 50,000 to 1 Rupee, beginning at the exchange of 201. and ending with the exchange of 212 Rupees per 100 Dollars.

The Exchange consists in finding the true sum value for value. in the coin of one country for that of another.—The par of exchange is the fixed value of the coin of one country compared with that of another. The course of exchange is the current price, and is always unsettled, being sometimes above, and sometimes below par, according to various contingencies, connected with, and arising out of the commercial and political relations of countries with each other.

The different kinds of exchange are so multifarious that I must limit my exposition to one example only.

If it be proposed to remit to China the sum of Sicca Rupees 15609, then to ascertain the value of the same in Spanish Dollars, the rate of Exchange being at 204 Sicca Rupees per 100 Dollars, refer to page 300.

	Sa. Rs.			Dollars	D. Ps.
In the first column	10000	second column	4001	960, 160

-----	9	-----	4	411, 156
	-----			-----	-----
Sicca Rupees.	15609		Dollars.	7651	474, 4
	-----			-----	-----

In the use of Tables 11*, 12, 13, 14, 15, 16, and 17, by referring to the first and second or third columns, the value of the coin of one country for that of another will be found.

TABLE XI*.

Contains the Exchange of Dollars into Rupees, from 50,000 to 1 Dollar, at the same rates of exchange, as in the foregoing table.

TABLE XII.

Contains the Exchange between Calcutta and Bombay, from 100,000 Rupees to 1 Pie, beginning at the exchange of 101, and ending with the exchange of 116 Bombay per 100 Calcutta Rupees.

TABLE XIII.

Contains the Exchange between Bombay and Calcutta, from 100,000 Rupees to 1 Rea, at the same rates of Exchange as in the foregoing table.

TABLE XIV.

Contains the Exchange between Calcutta and Madras, from 100,000 Rupees to 1 Pie, beginning with the exchange of 300, and ending with the exchange of 350 Rupees per 100 Pagodas.

TABLE XV.

Contains the Exchange between Madras and Calcutta, from 50,000 Pagodas to 1 Cash, at the same rates of exchange as in the foregoing table.

TABLE XVI.

Exhibits the Exchange between Calcutta and London, from 100,000 Rupees to 1 Pie, beginning at the exchange of 2 shillings and ending with the exchange of 3 Shillings per Rupee.

TABLE XVII.

Contains the Exchange between London and Calcutta, at the same rates of exchange, as are exhibited in the foregoing table.

TABLE XVIII.

Contains Calculations for paying Servants' Wages, House Rent, &c. from 4 Annas to 500 Rupees per month, from 1 to 30 days, and from 1 to 12 months.

TABLE XIX.

Contains the Solution of Questions in Multiplication, Division, Reduction and Merchandizing.—For the use of this Table, see page 468.

TABLE XX.

Contains the Reduction of English Weight into Factory and Bazar Weights, from 500 Tons to 1 Ounce.—For the use of this and the two following Tables, see page 472.

TABLE XXI.

Contains the Reduction of Bazar Weight into Factory and English Weights, from 10,000 Maunds to 1 Chittack.

TABLE XXII.

Contains the Reduction of Factory Weight into Bazar and English Weights, from 10,000 Maunds to 1 Chittack.

TABLE XXIII.

Contains the Decimal Part for every day in the twelfth part of a Year, reckoning the year to consist of $365\frac{1}{4}$ Days.

TABLE XXIV.

Contains the Exchange as established for the adjustment of the Calcutta Customs.

It may also not be amiss to notice that at the end of these Tables, I have subjoined a complete explanation of the Art of Gauging, with a description of the Gauging Rod, and appropriate examples—a Table of Specific Gravity, or the relative Weights of various bodies ; also several Arithmetical Rules for calculating all Mercantile Accounts expeditiously and with facility ; likewise an alpha-

betical list of Coins, Weights. and Measures, of most parts of India, China, Persia, Arabia, and the Eastern Islands, from the best and latest Authorities, which I hope will be regarded as a useful *addenda* to the Tables, and particularly so to the Merchants and Agents of Calcutta.

After the above synopsis of the nature and contents of this Work, the editor has only to add that several of the Tables are entirely original, and of course not to be found in any similar book which has ever been published in this country. They have been calculated with the greatest degree of care and labour by the author, whose undeviating object has been, by the joint efficiency of accumulated matter, and eminent attention to correctness, to stamp this work with a character of general and comprehensive utility, hitherto unequalled by any similar performance, which has appeared in British India, so that it may, most truly and emphatically, deserve and enjoy, as well as bear the name of The **UNIVERSAL CALCULATOR.**"

TABLE I.

Shewing the Value of any quantity of Goods or Wares, ready cast-up, from 1 to 10,000, at the rate of from 1 Pie to 100 Rupees each.

34	3332	67	6566	—	—	34	3366	67	6633

The use of the foregoing Table: 1. In Multiplication. 2. In Division. 3. In Reduction. 4. In Merchandizing,

1. THE USE OF THE TABLE IN MULTIPLICATION.

Example 1.—Admit it were required to multiply 81 by 53: look at the top of the Table under (*The length or value of any Thing*) for 53 and casting your eye downward in the column of (*Breadth or Things valued,*) you will find 81, right against which under (*Products*) you will find 4293, which is the answer.

Example 2.—If you would find the Product of any 2 Numbers, with Cyphers to one or both, work for the significant figures as before, and add the Cyphers to the Product. Thus the Product of 53,000, by 81, is (adding the 3 Cyphers to the Product of 53 by 81) 42,93,000; or the Product of 5300 by 8100 is 42,930,000.

Example 3.—From the two foregoing Examples it may easily be gathered that any two Numbers may be multiplied together, tho' they exceed those actually mentioned in the Table: As suppose you would find the Product of 3159 by 95; to perform which, divide the number given into 2 or 3 parts, as here the 3159 into 3100 and 59; by the Table you will find that the Product of 3100 (or 31) by 95 (as by the 2d Example) is 294500 And the Product of 59 by 95 is 5605

The Sum of which is the Answer 300105

Example 4.—Or, if the Figures, both in the Multiplicand and Multiplier, exceed those in the Table, the work may be performed thus:

If 3159 is to be multiplied by 957, the Product of 3100

(as in the 2d Example) by 900 is 2790000

Also the Product of 3100 by 57 is 176700

And the Product of 59 by 57 (by the 1st Example) is 3363

And the Product of 59 by 900 is 53100

The Sum of which is the Answer 3023163

And thus may any two Numbers, tho' ever so large, be multiplied together only by Addition, with the help of the foregoing Table, dividing such large Numbers given into such Numbers as are contained in the Table, observing the first and second Examples and placing Units under Units, Tens under Tens, &c. of the several Products, as in the last Example, and having regard to the places of the Numbers you would have multiplied together in order to the right placing of such Products.

2. THE USE OF THE TABLE IN DIVISION.

Example 1.—When one Number is required to be divided by another, look for the Dividend in the Column of Products, and for the Divisor at the top and the Quotient is found to the left-hand such Dividend under (*Breadth*

To divide a Sum or Things valued,) so if 4559 were to be divided into that can be found 47 equal parts, look at the upper end of the Table for in the column of 47, and under that for 4559, right against which, toward the left-hand, you will find 97, which is the Quotient.

Example 2.—To divide a greater or other Number than what is expressed in the Table: as suppose it were required to divide 4559,654 by 85, look for 85 your Divisor at the top of the Table, and underneath that Number, in the column of Products, seek for the 4 first places of your Dividend toward the left-hand, which is 4559, and tho' you cannot find it exactly,

yet you will find 4505 to be next to it, less than it, against which, in the column under (*Breadth or Things valued*) you will find 53, which put in the Quotient, or any where by itself; and deducting the 4505 from the 4559, the remainder is 54, to which bring down the two next Figures in the Dividend or Number to be divided, which is 65; then look under your said Divisor 85, in the said column of Products for 5465, and you will find 5440 to be next to it, against which is 64 toward the left-hand, which put toward the right hand of the 53 aforesaid, and deduct the 5440 from 5465, and the remainder is 25; to which bring down the last Figure, or that in the Units' place of the Number given to be divided, and then look in the column of Products for 254, and you will find 170, against which, under your said Divisor 85, you will find (2) which put to the right-hand of your Quotient, viz. of the said 5364 and deduct the said 170 from 254, and the remainder is 84; so that 45.59.654 being divided by 85, the Quotient is 53642; which is a large sum, and done much sooner than by the common way of Division, and without the trouble of Multiplication. See the Example in the margin.

85)4559654(53642
4505

5465
5440
—
254
170
—

80 Remain.

But Note, That if nothing had remained after deducting the said 4505 (or had but one Figure remained) you might then have brought all the remainder of the Dividend down, and so proceeded, but two places of Figures remaining viz. 54, if you had brought to that the 654, you would have had five places of Figures to have had five sought for in the Table, which is one place more than can be found there for the most part

Note also, That the first of the two Figures (toward the right-hand) first put in the Quotient must always possess the same place the true Quotient, in the Quotient, as that Figure does in the Dividend, when Cyphers fall which you first subtract from, as in the last Example, in the middle there- 3 in the Quotient must be in Thousands' place, because of. 5 (the first Figure you make Subtraction from) in the

Dividend is in that place, & therefore to make 85)4505654(53007 Quotient.
the 3 in the Thousands' place of the Quotient, 4504
I place the 2 Cyphers between the 5 and the 7.
See the Example in the Margin.

654
595
—

59 Remain.

3. THE USE OF THE TABLE IN REDUCTION.

Example 1.—If you would reduce Rs. As. and Ps. into Ps.; as 47 Rs. 13 Rs. As. & Ps. reduced As. 11 Ps. Under 16, and against 47, Rs. As. Ps. into Ps. is 752, to which add the 13 As. then 47 13 11
by Examples the 3d and 4th of the use of the Table in Multipli- 16
cation, 760 by 12, produceth 9120; to which add the Product —
of 5 by 12; also 11 Pies, and the sum is the Answer. See 752
the work in the Margin. 13

765
12
—
9180
11
—
9191 Ans.

Example 2.—To reduce Pies into Rupees; as 23774 Pies. You may Pies reduced into do this by columns 12 and 16. First look in the column under 12, the Pies in 1 Anna, and you will find by the Rules in Division by the Table 2981 Annas, and 2 Pies, which reduce into Rupees by the column under 16, by the same Rules, and you will find Sa. Rs. 123 13 2, the Answer, as 12)23774(1981 Annas per Example in the Margin.

$$\begin{array}{r}
 228 \\
 \hline
 974 \\
 972 \\
 \hline
 2 \text{ Pies} \\
 16)1981: 2(123 \text{ Rupees.} \\
 192 \\
 \hline
 61 \\
 48 \\
 \hline
 13 \text{ Annas.}
 \end{array}$$

Example 3.—If you would reduce Avoirdupois Weight by the Table; as Hundreds, Quar- 47 Cwt. 12 Qrs. 16 lb. into Pounds; look at the top of ters, and Pounds, the Table for 47, and against 4, you will find 188; to reduced into Pds. which add your Quarter of a hundred, and the sum is 189 Quarters, because 4 Quarters is 1 Cwt. then multiply 189 by 28 (as by the 3d and 4th. or last Example foregoing) and adding the 16 lb. the sum is 5308 lb. for Answer. But this Question may be sooner 47 1 16 resolved, by multiplying 47 by 112, and adding the 1 4 Quarter (or 28 lb.) and the 16, thus:

$$\begin{array}{r}
 189 \\
 28 \\
 \hline
 5040 \\
 252 \\
 16 \\
 \hline
 5308 \text{ Answer.}
 \end{array}
 \left. \begin{array}{l} \\ \\ \\ \end{array} \right\} \text{Add.}$$

$$\begin{array}{r}
 47 \\
 112 \\
 \hline
 47 \text{ by } 110 \text{ is } \dots\dots\dots 5170 \text{ lb.} \\
 47 \text{ by } 2 \text{ is } \dots\dots\dots 94 \text{ lb.} \\
 1 \text{ Quarter } \dots\dots\dots 28 \text{ lb.} \\
 \hline
 16 \text{ lb.}
 \end{array}
 \left. \begin{array}{l} \\ \\ \\ \end{array} \right\} \text{Add.}$$

5308 Sum, or Answer.

Example 4.—If you would reduce Liquid Measure, viz. Tuns, Hogsheads, Reduction of Li- and Gallons, into Gallons, &c. as 32 Tuns. 3 Hhds. quid, or thin Mea- and 42 Gallons, into Gallons: look at the top of the sure. Table for 4, the Hhds. in a Tun, and against 32, you will find 128, to which add the 3 Hogsheads given, and the sum is 131 Hogsheads.

Theo by the 3d and 4th Examples of the use of the Table in Multiplication look at the head of the Table for 13 viz. Multiply 131 by 63 and the Product adding the 42 Gallons given is 19635 Gallons for Answer. See the work in the Margin.

$$\begin{array}{r}
 32 \text{ } 3 \text{ } 42 \\
 4 \\
 \hline
 128 \text{ Add.} \\
 3 \\
 \hline
 131 \text{ Hogsheads.} \\
 63
 \end{array}$$

19530	}	Add.
63		
42		

19635 Gallons.

4. THE USE OF THE TABLE IN MERCHANDIZING.

Example 1.—If the price of a Unit of any Commodity exceed 2 Rupees, The Price of Wine, the value of any number of Units of such price, &c. cast-up by the Table may be found by this Table; as 13 dozen of Wine at 37 Rs. per dozen, will cost 481 Rupees which is found by looking at the top of the Table for the price 37, and underneath in the column of Products, against 13, is 481 Rs. the Answer.

Example 2.—What cost 87 pieces of Cloth at 17 Rs. 8 As. per piece? The Cloth. 17 Rs. being found at the top of the Table, in the column of Products, under it you will find (against the 87) 1479 Rs. to which add $\frac{1}{2}$ of 87 for the 8 As. and the sum is 1522 Rs. 8 As. the Answer.

But Note, That where there are Annas above the Rupees in the price of a unit of any thing, then the best way is to work as in the 1st Example last foregoing, for the Rs. and for the As. by multiplying them by the number of the things, and reducing them into Rupees by the Rules in Division.

Example 3.—This Table is also useful in casting-up Bills of Exchange; Use in casting-up as if you would know the value of 1500 Spanish Dollars, Bills of Exchange, at 36 Annas, or 2 Rs. 4 As. per Dollar. By the Table, if you multiply 36 by 15 and add the Cyphers to the Product, you will find 54,000 Annas, which reduce at once into Rupees, by the Example of the use of the Table in Reduction, and you will find the Answer Sa. Rs. 3375.

Example 4.—You may likewise by this Table find the Interest or Dis-Use in Questions count of any sum of money; as the Interest of 472 of Interest. Rs. 2 As. and 10 Ps. for six months, at 11 per cent, per annum, is Sa. Rs. 26.

This is done by dividing the given Number by 10, supposing it 10 per cent (because 10 is one-tenth part of 100) so under 10, you will find in the column of Products 470, against which stands 47, and the 470 taken from 472, there rest 2 Rs. or 32 As. and the 12 As. given, make 44, against the next less to 44, viz. 40 in the column under 10, you will find 4, which is 4 As. then deducting 40 fr in 44, there rest 4 As. or 48 Ps. and the 10 Ps. given, make 58 Ps. the next number to which, in the Table under 10, is 50, against which stands 5, which is 5 Ps. so that a 10th-part of 472 is 47 4 5; a tenth part of which is 4 11 7. for a tenth-part of 47 Rs. is 4 Rs. and 7 Rs. remain, or 112 As. which, with the 4 As. make 116 As., a tenth-part of which is 11 Annas, and there resteth 6 As. or 72 Ps. and the 5 Ps. is 77 Pies; a tenth-part of which is 7 Pies, or 4 11 7, the sum of which is 52 Rs. the Interest of 472 12 10, for 1 year,

half of which	472 12 10, at 11 per ct.
is the Interest for six months.	47 4 5. --- 5 ---
See the whole work in the Margin, 1-10th of that is	4 11 7, --- 1 ---
all of which is easily done with-	
out the Table, by such as understand	52 the Sum.
Arithmetic.	

$\frac{1}{2}$ of which is 26 the Answer.

If the Discount for six months were required, that is to say, if 472 12 10, were paid six months before due, and an abatement, or Discount were to be made of 6 per Cent. for prompt payment.—You may do it near enough, by first finding the Interest of 472 12 10 for six months, as before taught, and deducting out of that principal the Interest 26 Rs. so the remainder is 446 12 10, to be paid presently, in lieu of 472 12 10, six months hence;

No. 1.

A Table. for reducing English Weight into Factory and Bazar Weights, from 500 Tons to 1 Ounce.

EXAMPLE.

	Tons.	Cwt.	Qrs.	lb.
Required the Bazar Weight of	47	6	1	14
	Bazar Mds. Seers. Ch. pds.			
45 Tons	1227	10	14	5
2 . Cwt.	62	29	1	5
1 Qr.		13	10	2
14 lb.		6	13	1
<u>47.6 . 14 Tons.</u>	<u>Bazar Maunds 1290 . 20 . 7 . 3</u>			

No. 2.

A Table. for reducing Bazar Weight into Factory and English Weights, from 10,000 Maunds to 1 Chittack.

EXAMPLE.

Required the English Weight of 4573 Bags of Rice, each 2 Bazar Maunds, $4573 \times 2 = 9146$ Bazar Maunds.				
	Tons.	Cwt.	lb.	oz. dr.
9000 Maunds,				330
100 ditto,	3	13	1	9 . 5 . 5
46 ditto,	1	13	2	26 . 2 . 2
<u>9146 Bazar Maunds.</u>	<u>Tons 335 . 7 . 0 . 7 . 7 . 7</u>			

No. 3.

A Table. for reducing Factory Weight into Bazar and English Weights, from 10,000 Maunds to 1 Chittack.

EXAMPLE.

Required the English Weight of				
	Factory Mds. Seers.			
	9534 . 10			
	Tons.	Cwt.	Qrs.	lb. oz. dr.
9000 Maunds				300
500 ditto,	16	13	1	9 . 5 . 5
34 ditto,		2	2	18 . 10 . 11
10 Seers				18 . 10 . 11
<u>9534 . 10 Factory Maunds.</u>	<u>Tons 316 . 16 . 0 . 18 . 10 . 11</u>			

GENERAL RULES.

ENGLISH WEIGHTS.

16 Drams 1 ounce.
16 Ounces 1 lb.
28 lb. 1 qr. of a cwt.
20 cwt. 1 ton.

BENGAL WEIGHTS.

10 Tenth-parts 1 chittack.
16 Chittacks 1 seer.
40 Seers 1 maund.
30 Factory mds. 1 ton.
110 do. 100 bazar mds.

GAUGING.

GAUGING is the art of measuring casks, by means of a *gauging rod*, or by taking the diameters of the cask at the head, bung, &c. and thereby ascertaining the contents.

DESCRIPTION AND USE OF THE GAUGING ROD.

The Gauging Rod is an instrument used in gauging, or measuring the contents of any vessel. That usually employed is the four-foot gauging rod. It is commonly made of box, and consists of four rules each, a foot long, and about three-eighths of an inch square, joined together by three brass joints; by which means the rod is rendered four feet long when the four rules are quite opened, and but one foot when they are all folded together. On the first face of this rod, marked 4, are placed two diagonal lines; one for beer and the other for wine; by means of which the content of any common vessel in beer or wine gallons may be readily found by putting the rod in at the bung-hole of the vessel till it meets the intersection of the head of the vessel, with the staves opposite to the bung-hole. For distinction of this line, there is written thereon, *beer and wine gallons*. On the second face, 5, are a line of inches and the gauge-line; which is a line expressing the areas of circles, whose diameters are the correspondent inches in ale-gallons. At the beginning is written, *ale area*. On the third face, 6, are three scales of lines; the first, at the end of which is written *hogshead*, is for finding how many gallons there are in a hogshead when it is not full, lying with its axis parallel to the horizon. The second line, at the end of which is written B. L. signifying a *butt lying*, is for the same use as that for the hogshead. The third line is to find how much liquor is wanting to fill up a butt when it is standing; at the end of it is written B. S. signifying a *butt standing*. In the half of the fourth face of the gauging rod, 7, there are three scales of lines, to find the wauts in a firkin, kilderkin, and barrel, lying with their axes parallel to the horizon. They are distinguished by letters F. K. B. signifying a *firkin*, *kilderkin*, and *barrel*.

Use of the diagonal lines on this rod. To find the content of a vessel in beer or wine gallons, put the brased end of the gauging rod into the bung-hole of the cask, with the diagonal lines upwards, and thrust this brased end to the meeting of the head and staves; then with chalk make a mark at the middle of the bung-hole of the vessel, and also on the diagonal lines of the rod, right against, over one another, when the brased end is thrust home to the head and staves: then turn the gauging-rod to the other end of the vessel, and thrust the brased end home to the end, as before. Lastly, see if the mark made on the

gauging-rod come even with the mark made on the bung-hole when the rod was thrust to the other end ; which if it be, the mark made on the diagonal line will, on the same lines, show the whole content of the cask in beer or wine gallons.

If the mark made on the bung-hole be not right against that made on the rod when you put it the other way, then right against the mark made on the bung-hole make another on the diagonal lines ; and the division on the diagonal line between the two chalks will show the vessel's whole contents in beer or wine gallons. Thus, *e gr.* if the diagonal line of a vessel be 28 inches four-tenths, its contents in beer gallons will be near 51, and in wine gallons 62.

If a vessel be open, as a half barrel, tun, or copper, and the measure from the middle on one side to the head and staves be 38 inches, the diagonal line gives 122 beer-gallons ; half of which, *viz.* 61, is the content of the open half tub.

If you have a large vessel, as a tun or copper, and the diagonal line taken by a long rule proves 70 inches ; the content of that vessel may be found thus : every inch at the beginning end of the diagonal line call ten inches. Thus ten inches become 100 inches ; and every tenth of a gallon call 100 gallons ; and every whole gallon call 1000 gallons.

Example. At 44.8 inches on the diagonal beer-line is 200 gallons ; so that 4 inches 48 parts, now called 44 inches 8 tenths, is just two-tenths of a gallon, now called 200 gallons ; so also if the diagonal line be 76 inches and 7-tenths, a close cask of such diagonal will hold 100 beer-gallons ; but an open cask but half so much, *viz.* 500 beer gallons.

Use of the Gauge Line. To find the content of any cylindrical vessel in ale gallons ; seek the diameter of the vessel in inches, and just against it on the gauge-line is the quantity of ale-gallons contained in one inch deep : this multiplied by the length of the cylinder will give its content in ale-gallons.

For example, suppose the length of the vessel 32.06, and the diameter of its base 25 inches ; to find what is the content in ale-gallons ? Right against 25 inches on the gauge-line is one gallon and 745 of a gallon ; which multiplied by 32.06, the length, gives 55.9447 gallons for the content of the vessel.

The bung diameter of a hogshead being 25 inches, the head diameter 22 inches, and the length 32.06 inches ; to find the quantity of ale-gallons contained in it ? Seek 25, the bung diameter, on the line of inches ; and right against it on the gauge-line, you will find 1.745 : take one-third of it, which is .580, and set it down twice : seek 22 inches in the head

diameter, and against it you will find of the gauge-line 1.356; one-third of which added to twice .580, gives 1.6096; which multiplied by the length 32.06, the product will be 51 603776, the content in ale-gallons. Note, this operation supposes, that the aforesaid hoghead is in the figure of the middle ustrum of a spheroid.

The use of the lines on the two other faces of the rod is very easy; you need only put it downright into the bung-hole (if the vessel you desire to know the quantity of ale-gallons contained therein be lying) to the opposite staves; and then where the surface of the liquor cuts any one of the lines appropriated to that vessel, will be the number of gallons contained in that vessel.

PROBLEM *To determine the contents of any cask, by taking the head and bung diameters, and the length of the cask.*

NOTE. Casks have been divided into four varieties or forms; and for determining their contents several rules have been laid down, which are sometimes operose and at best but approximations; for in taking the dimensions of casks if the heads be not circular, if the bung-hole be not exactly in the middle of the cask, or if the bung stave or its opposite, be thicker, thinner, or more or less prominent than the others, a difference will arise. But the following rule will on all occasions be found the most easy and expeditious, and sufficiently, accurate for the common purposes of business.

RULE. Subtract the head diameter from the bung diameter, and note the difference.

Multiply the difference by 7, if the cask be of the *first form*, that is when the staves are much curved or bulging between the bung and the head. If the cask be of the *second form*, or having its staves less bulging, multiply by .65. If the staves are still less bulging, multiply by .57, which is the *third form*. And lastly, if the staves are nearly straight from the bung to the head, the cask is then reckoned of the *fourth form*, and the difference between the head and bung diameters must be multiplied by 52.

To the product thus found, add the head diameter and the sum will be a *mean diameter*; by which means the cask is reduced to the form of a cylinder.

Square the mean diameter and multiply the square by the length of the cask; divide that product by 359, which will give the contents in ale gallons, or divide by 294 for the contents in wine gallons.

EXAMPLES.

Required the contents of a cask of the first form, whose length is 40, and bung and head diameters 32 and 24 inches?

$$32 - 24 = 8 \text{ the difference.}$$

$$\text{and } 8 \times 7 \times 24 = 29.6 \text{ the mean diameter.}$$

$$\text{then } 29.6 \times 40 \text{ (the length)} = 35046.4.$$

$$\text{and } \frac{35046.4}{2.2} = 97.62, \text{ \&c. the contents in ale gallons.}$$

$$\text{and } \frac{35046.4}{2.04} = 119.2 \text{ wine gallons.}$$

Required the contents of a cask of the second form, whose length is 40, and bung and head diameters 32 and 24 inches?

$$32 - 24 = 8 \text{ the difference.}$$

$$\text{and } 8 \times 65 \times 24 = 29.2 \text{ the mean diameter.}$$

$$\text{then } 29.2 \times 29.2 \times 40 = 34105.6.$$

$$\text{now } \frac{34105.6}{3.6} = 95 \text{ the contents in ale gallons.}$$

$$\text{and } \frac{34105.6}{2.94} = 116 \text{ the contents in wine gallons.}$$

Required the contents of a cask of the third form, whose length is 40, and bung and head diameters 32 and 24?

$$\text{Ans. } \begin{cases} \text{Wine gallons } 110.976. \\ \text{Ale gallons } 90.883 \text{ nearly.} \end{cases}$$

Suppose the bung diameter of a cask be 26.5 inches, head diameter 23 inches, and length 28 inches, what is the contents in ale gallons for each variety of casks?

$$\text{Ans. } \begin{cases} \text{first variety } 50.5171 \\ \text{second variety } 49.8248 \\ \text{third variety } 48.727 \\ \text{fourth variety } 48.047 \end{cases}$$

OF SPECIFIC GRAVITY.

The specific gravities of bodies, are their relative weights, contained under the same given magnitude, as a cubic foot, or a cubic inch, &c.

The specific gravities of several sorts of matter are expressed by the numbers annexed to their names in the following table:

A Table of the Specific Gravities of Bodies.

Fine gold.....	19640	Cast brass	8000
Standard gold	18888	Steel.....	7850
Quick silver.....	13600	Iron	7645
Lead.....	11325	Cast iron.....	7425
Fine silver.....	11091	Tin	7320
Standard silver.....	10535	Marble.....	2700
Copper.....	9000	Common stone.....	2520
Gun metal.....	8784	Loom.....	2160

Brick	2000	Oak.....	925
Light earth.....	1984	Gun-powder, shaken...	922
Solid gun-powder..	1745	Ash	800
Sand.....	1520	Maple.....	755
Pitch	1150	Elm.....	600
Box-wood	1030	Fir.....	550
Sea-water.....	1030	York	240
Common-water...	1000	Air.....	1 $\frac{1}{4}$

NOTE.—The several sorts of wood are supposed to be dry. Also, as a cubic foot of water weighs just 1000 ounces avoirdupois, the numbers in this table express, not only the specific gravities of the several bodies, but also the weight of cubic foot of each, in avoirdupois ounces; and hence, by proportion, the weight of any other quantity, or the quantity of any other weight, may be known, as in the following problems.

PROBLEM I. *To find the magnitude of any body from its weight.*

As the tabular specific gravity of the body,
Is to its weight in avoirdupois ounces,
So is one cubic foot, or 1728 cubic inches,
To its content in feet, or inches, respectively.

EXAMPLES.

1. Required the content of an irregular block of common stone, which weighs 1 cwt. or 112 lb.?

$$1 \text{ cwt.} = 112 \text{ lb} = 1792 \text{ oz.}$$

Then as 2520 : 1792 oz : 1728 : 1228·8 the Answer.

2. How many cubic inches of gun-powder are there in one pound weight?

Ans. 30 nearly.

3. How many cubic feet are there in a ton weight of dry oak?

Ans. $38\frac{13}{18}$

PROBLEM II. *To find the weight of a body from its magnitude being given.*

RULE. As one cubic foot or 1728 inches,
Is to the contents of the body,
So is its tabular specific gravity,
To the weight of the body.

EXAMPLES.

1. Required the weight of a block of marble, whose length is 63 feet, and its breadth and thickness, each 12 feet; these being the dimensions of one of the stones in the walls of Balbec.

$$\left\{ \begin{array}{l} 63 \times 12 \times 12 = 9072 \text{ cubic feet in the stone.} \\ \text{Then as 1 cubic foot: 9072 cubic feet: 2700 oz. (tab. wt.)} \\ \quad 63.4 \text{ tons.} \end{array} \right.$$

Answer 683.4 tons, which is equal to the burthen of a large ship.

2. What is the weight of a pint of gun-powder, ale-measure?
Ans. 19 oz. nearly.

3. What is the weight of a block of dry oak, which measures ten feet in length, 3 feet in breadth, and $2\frac{1}{2}$ feet deep;
Ans. 4335 $\frac{1}{2}$.

PROBLEM III. *To find the specific gravity of a body.*

RULE 1. When the body is heavier than water, weigh it both in water, and out of water, and the difference will be the weight lost in the water.

Then as the weight lost in water, is to the whole weight,

So is the specific gravity of water, to the specific gravity of the body.

EXAMPLES.

A piece of stone weighed in air 10 pounds, but in water only $6\frac{1}{4}$ lb. required its specific gravity?

$$10 - 6\frac{1}{4} = 3\frac{3}{4}$$

And $3\frac{3}{4} : 10 : 1000 : 3077$ the Answer.

RULE 2. When the body is lighter than water, so that it will not quite sink; affix to it a piece of another body heavier than water, so that the mass compounded of the two may sink together. Weigh the heavier body, and the compound mass, separately, both in water and out of it; then find how much each loses in water, by subtracting its weight in water from its weight in air; and subtract the less of these remainders from the greater. Then say,

As this last remainder,

Is to the weight of the light body in air,

So is the specific gravity of water,

To the specific gravity of the body.

EXAMPLES.

Suppose a piece of elm weighs in air 15 lb. and that a piece of copper which weighs 18 lb. in air, and 16 lb. in water, is affixed to it, and that the compound weighs 8 lb. in water. Required the specific gravity of the elm?

$$\begin{array}{rcl}
 & 18 \text{ in air} & 33 \\
 & 16 \text{ in water} & 6 \\
 \hline
 \text{loss} & 2 & 27 \text{ loss} \\
 & & 2 \\
 \hline
 & & 25
 \end{array}$$

$$25 : 15 :: 1000 : 600 \text{ Ans.}$$

PROBLEM IV. *To find the quantities of two ingredients in a given compound.*

RULE. Take the differences of every pair of the three specific gravities, viz. of the compound and each ingredient, and multiply the difference of every two by the third.

Then as the greatest product is to the whole weight of the compound, so is each of the other products, to the weights of the two ingredients.

EXAMPLES.

A composition of 112 lb. being made of tin and copper, whose specific gravity is found to be 8784; required the quantity of each ingredient? The specific gravity of tin being 7320, and of copper 9000.

$$(9000 - 7320) \times 8784 = 14757120$$

$$(9000 - 8784) \times 7320 = 1581120$$

$$(8784 - 7320) \times 9000 = 13176000$$

Then as 14757120 : 112 :: 13176000 : 100 : the quantity of copper, and 112 - 100 = 12 the quantity of tin.

TO FIND THE TONNAGE OF SHIPS.

RULE. Multiply the length of the keel, by the breadth of the beam, that product again by half the breadth of the beam, and divide the last product by 94, the quotient will be the tonnage required.

EXAMPLES.

A Ship's keel is 72 feet, the breadth of her beam 24, what is her tonnage?

$$\frac{72 \times 24 \times 12}{94} = 220.6 \text{ the Ans. or tonnage.}$$

A vessel is 60 feet long by the keel, and 20 by the beam, what is her tonnage?

Ans. $127\frac{2}{3}$ nearly.

What is the tonnage of a ship, whose keel is 84 feet long, and the breadth of her beam 28 feet?

Ans. 360.93 tons.

TO FIND THE WEIGHT OF ROPES.

RULE. Multiply the square of the circumference in inches, by the length in fathoms, and divide the product by 480 for the weight in cwts.

NOTE. Rope is distinguished by its circumference; thus a two-inch rope, means a rope of 2 inches circumference, &c.

EXAMPLES.

What will be the weight of 100 fathoms of 3-inch rope?

$$\frac{3 \times 3 \times 100}{480} = \frac{900}{480} = 1 \text{ cwt. 3 qrs. 14 lb.}$$

What will be the weight of a 6-inch hawser of 120 fathoms long?

Ans. 9 cwt.

Several Arithmetical Rules

FOR

CALCULATING ALL MERCANTILE ACCOUNTS

EXPEDITIOUSLY AND WITH FACILITY.

INTEREST AND DISCOUNT.

The Interest of any sum, for any number of years, is found by multiplying the principal by the rate per cent. and that product by the number of years, then dividing the last product by 100. The Interest for any number of months may be found by considering what part they are of a year—and for any number of days, by considering what part they are of a month of 30 days.

For Discount, first find the Interest of 100 for the given time, and add it to 100, then say, as that sum is to 100, so is the sum to be discounted to its present value, which subtract from the principal, and the difference is the discount.

EXAMPLE.

What is the Interest of 11245 Rupees, for 2 years, at 8 per cent. per annum?

SOLUTION.

$$\begin{array}{r}
 11245 \\
 8 \\
 \hline
 89960 \\
 2 \\
 \hline
 1799,20 \\
 16 \\
 \hline
 3,20 \\
 12 \\
 2,40 \\
 \hline
 \end{array}$$

Answer, Rupees 1799 3 2

What is the discount on the same sum, for the same time, and at the same rate?

Cc*

Interest on 100 Rs. for 2 years is 16 Rs. which added to 100 is 116 Rs.

$$116 : 100 : 11245$$

100

$$116)1124500(9693 \text{ Rs.}$$

1044

$$116)1792(15 \text{ As.}$$

116

632

580

52

12

$$116)624(5 \text{ Pie}$$

580

44

Principal .. 11245 0 0

Present Worth 9693 15 5

Discount .. 1551 0 7

The solution in the above Interest sum speaks for itself, and so does the other in discount ; but we must observe, this last is a mode of calculation rendered by a universal custom entirely obsolete, and although equitable and perfectly correct, it is nevertheless disregarded and rejected by merchants all over the world;—with merchants, to discount a bill is simply to

take of the rated Interest for the time it has to run, thus,—in the first example, to discount a bill for 11,245 Rupees that has to run two years :

Principal.....	11,245	0	0
Less Interest for 2 years...	1,799	3	2
	<hr/>		
Present Worth....	9,445	12	10
	<hr/>		

By doing which there is a positive loss sustained by the bill holder of Rupees 248 2 7, and which arises upon the Interest being deducted, without making any allowance for Interest upon that deduction, which would not be the case if discounted correctly.

What is the Interest of Rupees 1540 14 9 for 2 years, 7 months and 25 days, at 8 per cent. per annum?

SOLUTION.

	1540	14	9
			8
	<hr/>		
6 months is the $\frac{1}{2}$	12327	6	0
			2
	<hr/>		
	24654	12	0
1 month is the $\frac{1}{3}$	6163	11	0
15 days is the $\frac{1}{4}$ and 10 days $\frac{1}{5}$	1027	4	6
	513	10	3
	342	6	10
	<hr/>		
	327,01	12	7
		16	
		<hr/>	
		28	
		12	
		<hr/>	
		3,43	
	<hr/>		

Answer, Rupees 327 0 3

Illustration.—Agreeably to the rule—"The Interest for any number of months may be found by considering what part they are of a year, and for any number of days, by considering what part they are of a month of 30 days :—" The above solution exhibits the rule of Interest in all its branches, viz. the principal multiplied by the rate per cent.

then by the number of years ; and in considering what portion of a year 7 months are, they are found to be in two divisions, viz 6 are the half of 12 months, or one year, and 1 the $\frac{1}{6}$ of 6 the first divisor, and for the days 15 are the $\frac{1}{2}$ of one month, and 10 the $\frac{1}{3}$, both taken out of the last divisor by months ; —this addition divided by 100, gives the answer as seen in the work.

COMMISSION, PREMIUM, BROKERAGE AND INSURANCE.

RULE :

Multiply the sum by the rate per cent. and take parts with the fraction (if any) ; that amount, divided by 100, will give the answer.

EXAMPLE.

What is the commission on 10,000 Rs. at $2\frac{1}{2}$ per cent.?

SOLUTION.

$$\begin{array}{r}
 \frac{1}{2} \text{ is } \frac{1}{2} \text{ 10,000} \\
 \quad \quad \quad 2 \\
 \hline
 20,000 \\
 \quad 5000 \\
 \hline
 250,00 \text{ Answer, 250 Rs.}
 \end{array}$$

BARTER.

Is the changing one commodity for another, and teaches traders to proportion the quantities without loss.

RULE :

Find the value of given and required quantities by the most concise method ; then proportion, or find the rate of exchange, buying or selling, by the rule of three.

EXAMPLE.

How many corge of baftaes, at 5 Rs. per piece, must be given in barter for 45 maunds of cloves, at 10 Rs. per seer.

SOLUTION.

		mds.	
		45	maunds, at 10 Rs. per seer
		40	
		<hr/>	
		1800	
		10

		20)3600	
		<hr/>	
		<hr/>	
		Corge 180	Answer

EQUATION OF PAYMENTS.

Is the finding of a time to pay at once several Debts due at different times, so that no loss shall be sustained by either Party.

RULE:

Multiply each payment by the time at which it is due, then divide the sum of the products by the sum of the payments, and the quotient will be the equated time.

EXAMPLE.

Suppose I receive drafts in payment of an old standing debt, as follows: 1 draft at 3 months, for 5000 Rs. 1 ditto, at 6 months, for 5000 Rs. 1 ditto, at 9 months, for 5000 Rs. and 1 ditto, at 12 months, for 5000 Rs. what is the equated time for the whole to be made in one payment.

SOLUTION.

5000	×	3	=	15000	
5000	×	6	=	30000	
5000	×	9	=	45000	
5000	×	12	=	60000	
		<hr/>			
20000				(150000)	7 months
				140000	
				<hr/>	
				10000	

$$\begin{array}{rcl}

 \text{Answer, 7 months and 15 days.} & &
 \end{array}$$

LOSS AND GAIN.

Is an excellent rule by which all who are engaged in mercantile pursuits, may discover their profit or loss, per cent. by the gross, &c. It also instructs us to raise, or fall the price of goods, so as to gain, or lose just so much, and no more.

RULE:

1st. Calculate the cost and sale, and the difference between them, will give the gross loss, or gain; then if the gain or loss per cent. be required.

As the prime cost is to the gain, or loss, so is 100 to the gain, or loss per cent.

2d. To ascertain the rate, an article should be sold to gain, or lose so much per cent.

As 100 is to the price, so is 100 with the profit added, or loss subtracted to the gaining or losing price.

3d. When there is a gain, or loss per cent. to find the prime cost of the article.

As 100 with the gain per cent. added, or loss per cent. subtracted, is to the price, so is 100 to the prime cost.

EXAMPLE.

If I buy Nyansook, at 15 Rs. per piece, and sell it at 18 Rs. what is the gain per cent.?

$$\begin{array}{rcl}
 & 18 & \\
 & 15 & \\
 & \hline
 & 3 \text{ gross gain} & \\
 & \hline
 15 : 3 : 100 & & \\
 & 3 & \\
 & \hline

 \end{array}$$

SINGLE FELLOWSHIP.

Is when Partners' Stocks are employed an equal time in Trade.

RULE.

As the whole Stock is to the whole gain, or loss, so is each person's particular Stock to his particular Share of the gain or loss.

Proof.—Add all the particular Shares of the gain, or loss, together; that sum if it be equal to the whole gain, or loss, the work is right.

EXAMPLE.

A and B in company, A put in 80,000 Rs. and B 1,20,000, and they gain 50,000 Rs. what is each man's share?

SOLUTION.

A's stock.. 80,000

B's ditto...1,20,000

$$\begin{array}{r} 2,00,000 : 50,000 :: 80,000 \\ 80,000 \end{array}$$

4000,000,000

20,000 A's share of the gain.

Whole gain..... 30,000

A's share..... 20,000

B's ditto..... 30,000

To which add A's. 20,000

Proof 50,000

DOUBLE FELLOWSHIP.

Is when partner's stocks are employed an unequal length of time.

RULE.

Multiply each partner's particular stock by his respective time, taking the total of these products for the first number; take the whole loss or gain for the second, and let the product of every particular partner's stock and time be the third number; repeat the Rule of Three as often as there are partners, and the several fourth numbers produced by these operations are the numbers required.

Method of Proof is the same as in Single Fellowship.

EXAMPLE.

A and B enter into a joint Concern, or Copartnership; but A had been 6 months in the business, when B came in, who brought a Stock of 40,000 Rs which was double A's Capital at his commencing, and at the expiration of 6 months from the period of B's coming in, at the winding up of Accounts, they had gained 30,000 Rs. how much is each man's share?

SOLUTION.

$$20,000 \times 12 = 2,40,000 \text{ A's stock and time}$$

$$40,000 \times 6 = 2,40,000 \text{ B's ditto}$$

$$\begin{array}{r} \text{A's } 4,80,000 : 30,000 :: 2,40,000 \\ \hline 24 \end{array}$$

$$\begin{array}{r} 48)720,000(15,000 \text{ A's share.} \\ \hline 48 \end{array}$$

$$240$$

$$240$$

$$\begin{array}{r} \text{A's } 480,000 : 30,000 :: 2,40,000 \\ \hline 24 \end{array}$$

$$\begin{array}{r} 48)720,000(15,000 \text{ B's share} \\ \hline 48 \end{array}$$

$$240$$

$$240$$

$$\text{Then } 15,000 + 15,000 = 30,000 \text{ proof}$$

Illustration. When Partners adventure Stock upon equal time, it is evident the shares of gain or loss must be in proportion to the Stock, as fully shewn in single Fellowship; and when the Stocks are equal, the shares are proportioned on the time; and when neither are equal, the shares must be as their products. In the above example, neither are equal, yet the Partners receive an equal share of the gain, owing entirely to the difference of time, as is evident from the work;—in the following example, the shares are proportioned on the time only, viz.

THE RULE.

As the aggregate of the time is to the whole loss or gain, so is each partner's time to his particular share of the loss or gain.

EXAMPLE.

A adventured 40,000, twelve months, and B 40,000, six months, they gained 30,000 Rs.; now to divide the profits, say

As A's time 6 months

Added to B's 12 ditto

18 is to 30,000 so is A's time 6 months

6

18)1,80,000

10,000 to A's share of the gain.

And as 18 is to 30,000 so is B's time 12 months.

12

18)3,60,000

20,000 to B's share of the gain.

10,000 \times 20,000 = 30,000 Proof.

EXCHANGE,

Is the bringing of Money, or Weight of one country to that of another country.

The first point to be considered in calculating exchanges, is the divisions, sub-divisions, and fractional parts of each species of money or weights.

2. To observe that whatever remains after division, to multiply it by the next sub-division of the money or weight into which it is to be reduced, and divide as before, and so on to the last.

3. When there is a division of a fraction, (which is very frequently the case) it must be reduced into such a fraction, and the dividend must also be multiplied by the same, before division, thus: English Avoirdupois weight, compared with Factory weight is at $74\frac{2}{3}$ lbs. per maund; here the 74 must be multiplied by 3, and add in the 2, making 224 for the divisor, —the dividend, must of course be of the same name before you can proceed in the operation, according to the Rule of Three.

These circumstances well considered, there can be no difficulty in performing any operation through exchanges.

EXCHANGE OF MONEY,

Means the bartering or exchanging of the money, (whether real or imaginary) of one place for that of another, and consists in finding what quantity of money of one place will be equivalent to a given sum of another, at a certain rate of exchange.

BENGAL.	Ct. Rs.
100 Sicca Rupees are	116
100 Madras Arcot	108
100 Bombay Soortie.....	110
100 Mooney Soortie	109
100 Sonaut Fooley	113
100 Old Sonaut.....	111
100 Patney Sonaut.....	111
100 Furruckabad.....	112½
100 Moohedah	109
100 Moorshedabad.....	111
100 Lucknow.....	113½
100 Duss Massa	110

Money, in this country, is of two descriptions, sicca or real, and current or imaginary,—and the difference between the one and the other is called batta: money in this country is turned into each other through the medium of currency.

To bring Rupees of one description into Rupees of another description, multiply the description given (reduced if require d) by 100 increased by the centage of its own kind, and divide by 100 increased by the centage of the description required, the results will be the answer in the same name with the last denomination.

EXAMPLE :

Bring 7250 old Sonaut Rupees into Sicca Rupees.

$$\begin{array}{r}
 7250 \\
 111 \\
 \hline
 7250 \\
 7250 \\
 7250 \\
 \hline
 116)804750(6937 \text{ Rs.} \\
 696
 \end{array}$$

$$\begin{array}{r}
 1087 \\
 1044 \\
 \hline
 435 \\
 348 \\
 \hline
 870 \\
 812 \\
 \hline
 58 \\
 16 \\
 \hline
 348 \\
 58 \\
 \hline
 116)928(8 \text{ Ans.} \\
 928 \\
 \hline
 \end{array}$$

Illustration. The above example proposes to change old so-
naut rupees, (which are 11 per cent. better than current ru-
pees,) into sicca rupees, (at 16 per cent. better than current);
according to the rule, therefore, add 11 to 100 for a multiplier,
and 16 to 100 for a divisor, the result will be in sicca specie;
and in like manner proceed in all other similar cases: suppose
it were required to change 5350 12 9 sicca rupees to Bom-
bay soortie rupees; then sicca rupees being the description
given, and are 16 per cent. better than current, add 16 to 100
for a multiplier; and Bombay soortie rupees being the descrip-
tion required, add 10 to 100 for a divisor, the result will be in
Bombay specie, as follows:

$$\begin{array}{r}
 5350 \quad 12 \quad 9 \\
 16 \\
 \hline
 85612 \\
 12 \\
 \hline
 1027353 \\
 116 \\
 \hline
 6164118 \\
 11300883 \\
 \hline
 110)119172948(1083390 \\
 110 \\
 \hline
 917 \\
 880 \\
 \hline
 \end{array}$$

	372
12)1083390	330
16)90282 6	429
	330
Bom. Rs. 5642 10 6 Ans.	
	994
	990
	48

In this example the last denomination is in pie, consequently the quotient will be in pie, which must be brought into Rupees.

LONDON, MADRAS, BOMBAY, CHINA, &c. &c. &c.

In calculating Exchanges as well as in all other calculations, the shortest method should always be adopted, and the Rule of Practice made as much use of as possible, being the most expeditious, thus :

In 20,000 Sicca Rupees, how many £ sterling, exchange at 2s. 3d. per Sicca Rupee.

OPERATION.

$$\begin{array}{r}
 3d. = \frac{1}{4} \text{ 20000} \\
 \underline{2} \\
 40000 \\
 5000 \\
 \hline
 20)45000(\\
 \underline{\text{£}2250} \text{ Answer.}
 \end{array}$$

And so of all other monies, when it can be done ; and where it cannot the Rule of Three must be resorted to. For instance the above sum cannot be proved by the Rule of Practice, consequently the operation must be performed by stating thus :

In 2250 £ sterling, how many Sicca Rupees at 2s. 3d. per Sicca Rupee.

OPERATION.

	r.	£
2s. 3d. 1.		2250

The above few examples, will it is hoped be fully sufficient to lay a foundation in the student for practical knowledge.

 EXCHANGE OF WEIGHTS,

Means the bringing or reducing of the weight of one place into that of another place, and consists in finding what will be the weight of one place equivalent to a given weight of another place.

BENGAL.

80	Sicca Weight is.....1	Calcutta Bazar Seer
60	ditto.....1	Serampore ditto
82	ditto.....1	Hooghly ditto
84	ditto.....1	Benares ditto
96	ditto.....1	Allahabad ditto
84	ditto.....1	Mirzapore ditto
96	ditto.....1	Lucknow ditto

To bring maunds of one place into maunds of another place ; multiply the weight given (reduced if of more denominations than one) by the siccas in its own name, and divide by the siccas in the place required ; the result will be the answer in the same manner with the last denomination.

In 1500 Serampore maunds how many Calcutta Bazar maunds ?

$$\begin{array}{r}
 1500 \\
 80 \\
 \hline
 60 \overline{) 120000} \\
 \hline
 20000 \text{ Answer}
 \end{array}$$

In 875 maunds 10 seers 14 chittacks of Lucknow, how many maunds, seers and chittacks Calcutta Bazar Weight.

$$\begin{array}{r}
 875 \quad 10 \quad 14 \\
 40 \\
 \hline
 35010 \\
 16 \\
 \hline
 560174 \\

 \hline
 \hline
 \end{array}$$

Illustration. This example has a third denominator, that is maunds, seers and chittacks; consequently after being reduced and wrought as the rule directs, the quotient will be in chittacks, which must be brought into maunds by division, as usual.

To bring Bazar maunds into Factory maunds multiply by 11 and divide by 10, and to bring Factory maunds into Bazar maunds multiply by 10 and divide by 11

Bring 980 maunds 10 seers Bazar weight into Factory weight.

$$\begin{array}{r}
 980 \quad 10 \\
 11 \\
 \hline
 10)10782 \quad 30 \\
 \hline
 \text{Factory Maunds } 1078 \quad 11 \quad \text{Answer.} \\
 \text{Es*}
 \end{array}$$

Bring 1 78 maunds 11 seers Factory weight into Bazar weight.

$$\begin{array}{r} 1 \cdot 78 \quad 11 \\ \quad 10 \\ \hline 11)10782 \quad 11 \end{array}$$

Bazar Maunds 980 10 Answer.

LONDON, MADRAS, BOMBAY, CHINA, &c &c &c.

Comparative view of the several denominations of Weights used in different parts of India, compared with Avoirdupois Weight:

	lb.
1 Bazar Maund, is equal to	$8 \frac{2}{15}$
1 Factory ditto	$7 \frac{1}{2}$
1 Madras ditto	25
1 Ditto Candy	560
1 Company Maund	28
1 Ditto Candy	560
1 Tellicherry Maund	30
1 Ditto Candy	600
1 Angkor maund	28
1 Ditto Candy	560
1 Cochin maund	$27 \frac{2}{3}$
1 Ditto Candy	$54 \frac{1}{3}$
1 Goa maund	$24 \frac{1}{2}$
1 Ditto Candy	495
1 Canet maund	30
1 Ditto Candy	600
1 Muscat maund	$8 \frac{1}{2}$
1 Pegue Candy of 150 Vis	500
1 Pecul of 10 Cattes, at China and Bencoolen	$133 \frac{1}{3}$
1 Ditto ditto, at Manilla	$137 \frac{1}{4}$
1 Ditto of 50 Cattes, at Siam	129
1 Bahar of 3 Peculs, at Malacca	405

To bring weights of one description into weights of any other description, multiply the weight given by its own avoirdupois weight, contained in one maund, candy, pecul, or bahar, and divide the product by the avoirdupois weight contained in one maund, candy, pecul. or bahar of the weight required, the quotient will be the answer.

EXAMPLES.

Bring 1078 mds. 11 seers Factory Weight into Avoirdupois Weight

AN
Alphabetical List
 OF
COINS, WEIGHTS, AND MEASURES,
 OF MOST PARTS OF
India, China, Persia, Arabia, and the Eastern Islands,
 FROM THE BEST AND LATEST AUTHORITIES.

ACHEEN.

Coins, Weights, and Measures.

COINS.—Spanish dollars, pagodas, rupees, and other foreign coins pass current here. They have a small gold coin called a manna, which serves to pay servants and other small expences, but is of very base metal, and difficult to pass; also a small lead cash, of which you get from 200 to 1000 for a mace.

Accounts are kept in tales, mace, copangs, and cash.

GOLD WEIGHTS are the copang, mayam, mace, tale, buncal, and catty, and are thus divided:

4 copangs.....	}	make	{1 mace
5 mace1 mayam
16 mayams.....			1 tale
5 tales.....			1 buncal
20 buncals.....			1 catty.

The true standard of a buncal is 80 mace, though the merchants alter it at their pleasure, making it heavier or lighter: but in proportion as the buncal is altered, so must the catty be: from this cause the catty varies from 265 to 280 pagodas.

1 Acheen catty of gold dust, weighing 280 pagodas, is worth at Madras from 300 to 310 pagodas.

GREAT WEIGHTS are the buncal, catty, and bahar, and are thus divided:

oz. dwt. gr. lbs. oz. gr.

20 buncals make 1 catty, which is troy wt. 3 17 12 avoird. 2 1 13
 200 catties. — 1 bahar, ditto, 501 lbs. 5 oz. 10 dwts. 422 15 0

1½ China catty is commonly reckoned a Malay catty, which brings 3 China peculs equal to 1 bahar.

All goods are weighed by the dotchin, which should be carefully examined and proved with English weights; the smaller the quantity of your goods when are weighed at a time to the Native, under 100 catties, the more to your advantage.

MEASURES.—With the following they receive and deliver all kinds of grain:

2 chopahs.....	}	make	{..... 1 quarter
2 quarters.....			{..... 1 bamboo
16 bamboos.....			{..... 1 nely
10 nellies.....			{..... 1 chuncha
10 chunchas.....			{..... 1 coyang

They have a particular measure with which they deliver salt, called a parah, which ought to contain 25 puies or bamboos, 80 of which make a quoyane, about two-thirds of a Madras gauce.

Beetle-nut is measured by the parah, swept off with a board, one of which being counted, serves for a whole cargo. A loxa of beetle-nut is 10,000 nuts, and when good, should weigh 168 lbs.

AMBOYNA.

Coins, Weights, and Measures.

COINS —Accounts are kept in rix dollars. All kinds of coins pass here, but those most current are Spanish dollars, rupees, schillings, dubbeltjees, and doits, thus divided:

4 doits.....	}	make	{..... 1 stiver
4 stivers.....			{..... 1 dubbeltjee
6 stivers.....			{..... 1 schilling.

The following are the rates at which the undermentioned foreign coins pass current:

New duccatoon.....80 stivers	Rix dollars.....48 stivers
Old duccatoon.....78 ditto	Rupees.....30 ditto
Spanish dollar.....64 ditto	Star pagoda.....99 ditto
German crown.....60 ditto	Gold Mohur.....480 ditto

The usual rates of exchange in turning one species of coin into another, are thus calculated:

100 Spanish Dollars.	Rix dollars.....133 6 4	100 German Crowns.	Spanish dollars. ... 93 13 2
	New duccatoons.... 80 0 0		Rix dollars.....125 0 0
	German crowns....106 16 0		New duccatoons.. 75 0 0
	Rupees.....213 4 0		Rupees.....200 0 0
	Star pagodas..... 64 21 53		Star pagodas..... 60 20 25
100 Rix Dollars.	£ Sterling..... 26 13 4	100 Rupees.	£ Sterling..... 25 0 0
	Spanish dollars. ... 75 0 0		Spanish dollars.... 46 22 4
	New duccatoons.... 60 0 0		Rix dollars..... 62 9 6
	German crowns.... 80 0 0		New duccatoons.... 37 16 0
	Rupees.....160 0 0		German crowns.... 50 0 0
100 new Ducu- toons.	Star pagodas..... 48 16 20	100 Pa- godas.	Star pagodas..... 30 10 2
	£ Sterling..... 20 0 0		£ Sterling..... 12 10 0
	Spanish dollars....125 0 0		Spanish dollars.. 155 0 0
	Rix dollars.....166 12 8		Rix dollar..... 206 12 8
	German crowns ...133 8 0		New duccatoons....124 0 0
	Rupees.....266 8 0		German crowns....165 8 0
	Pagodas..... 80 27 7		Rupees.....330 8 0
	£ Sterling..... 33 6 8		£ Sterling..... 40 0 0

WEIGHTS—The Dutch and Chinese weights are in common use; but while the island was in the English possession, goods were in general sold by avoirdupois weight.

ANJENGO.

Coins, Weights, and Measures.

COINS.—Accounts are kept in rupees, fanams, pice, and budgerooks, thus divided :

4 budgerooks.. .. .	} make { 1 pice
12 pice.....	 1 fan m
6 Gallion fanams.....	 1 rupee
7 Travancore ditto.....	 1 rupee

An Anjengo fanam is reckoned in the Company's account at one-fifth of rupee. Here are two kinds of fanams, Gallion and Travancore; the former are the best by 16 per cent

Foreign coins pass current here, the mean rates of change being as under :

Negapatam pagoda passes for.....	20	to 21	Gallion fanams
Madras, or 3 swamy pagodas.....	19	to 19½	ditto
Port Novo pagoda.....	17	to 18	ditto
Venetians.. .. .	22	to 22½	ditto
Mexico dollars, full weight.....	12½	to 13	ditto
Duccatoons in tale.....	14½	to 15	ditto
Bombay, or Surat rupees.....	5	to 5½	ditto

100 oz Mexico dollars at 12½ fanams per dollar weight, and 5½ fanams per rupee, produce Rs. 242 3 65.

WEIGHTS.—The maund is 28 lbs. avoirdupois, and 20 maunds 1 candy, equal to 560 lbs. avoirdupois, which is equal to 7 factory maunds, 20 seers of Bengal, or 22 Madras maunds. 3 vis, 8 pollams.

MEASURES.—The Anjengo coid is half an English yard, or 18 inches.

ARACAN.

There was a mint at Aracan, where silver rupees were coined. An Aracan rupee is equal to 12 annas duss mussa, or in Aracan to three Kahawons, each Kahawon 16 puns of cowries.

AURUNGABUNDER.

Coins, Weights, and Measures.

Accounts are kept in rupees, carivals and pice, 12 pice making one carival, 50 carivals 1 rupee. Cowries are current in Scindy—48 cowries 1 pice.

The exchange between Tatta and Aurungabunder is 2½ per cent.

The weights and measures are as follows :—

SMALL WEIGHTS.			LONG MEASURES.		
24 moons	} make {	... 1 ruttee	1 garce	} make { 2 inches
6 ruttees.. 1 massa	16 garces.. 1 Guz.
12 massas.....		... 1 tollah	but 1 guz is 34 inches in cloth at Tatta		

GROSS WEIGHTS.				GRAIN MEASURE.			
4 pice.	} make	{	1 anna	4 puttoes	} make	{	1 twier
16 annas			1 puc. sr.	4 twiers			1 cossa
40 seers			1 maund	60 cossas			1 carival
which is equal to 74 lbs. 5 oz. 7 dwts. avoirdupois.			of wheat, which is 22 pukka maunds, or 21 Bombay paraahs.				

Diamonds and pearls are sold by hubbas and ruttees—8 hubbas equal to 1 ruttee, about 2 grs. troy.

BANDA NEIRA.

Coins, Weights, and Measures.

COINS—Accounts are kept in pennings, stivers, and rix dollars: 16 pennings make 1 stiver, 6 stivers 1 schilling; 8 schillings 1 rix dollar. Spanish dollars pass current, 125 Rix per 100 Spanish dollars.

WEIGHTS.—The catty weighs 5½ Dutch lbs. A bahar is 100 catties, or 610 lbs. avoirdupois.

BANJAR MASSIN.

Coins, Weights, and Measures.

COINS.—Spanish dollars are the current coin; a few Dutch coins from Batavia are to be met with; and for small change they have the Chinese cash. The following coins are also in circulation:

Pillar dollars; these, if full weight, pass the same as Spanish dollars.

French crowns; there is a loss on these if taken to China, therefore they should be avoided.

Rupees of various kinds, none of which should be carried to China.

Duccatoons pass here at the rate of 125 Spanish dollars per 100 ducatoon; at Canton, they vary, being sometimes as low as 122 Spanish dollars per 100 ducatoons.

WEIGHTS AND MEASURES—The weights in common use for gross articles are the pecul and catty; the small weights are teas, mace, and malaboorigs:

3 malaboorigs	} make	1 tea
6 teas		1 mace
16 mace		1 tale, equal to 20 dwts.

The measure for grain is the ganton, 230 of which are a last of rice, weighing 3066½ lbs. avoirdupois; the covid, as a long measure, is in common use.

BANTAM.

Coins, Weights, and Measures.

COINS.—The coins current are similar to those at Batavia, viz. Spanish dollars, ducatoons, rupees, schillings, dubbeltees, doits, and cash; the king having no coin of his own. The cash are of different value, according to the quantity in the market. They keep their accounts thus:

10 peccos	}	make	{	1 laxsan
10 lax us	1 catty
10 caties	1 mta
10 mas....				1 bahar.

Each pecco should contain 1000 cash, but they are frequently deficient; the price varies from 25 to 35 for a Spanish dollar.

WEIGHTS AND MEASURES — Pepper is sold by the *timbang*, which is equal to half a Chinese pecul or $62\frac{1}{2}$ Dutch lbs. 3 peculs are the small bahar, and $4\frac{1}{2}$ peculs the great bahar. But the natives not being expert in weighing, a measure called a kulack is used, which contains $7\frac{1}{2}$ catties; but this depends upon the quality of the pepper, whether light or heavy.

The weight for gold, musk, &c. is the tale; the China one is only six-tenths of that of Bantam.

The long measure is the hasta, which is 18 English inches.

BEEYLEACKIE.

Coins, Weights, and Measures.

Accounts are kept in Spanish dollars and cavears; 40 cavears are equal to one Spanish dollar; cavears are an imaginary coin, both here and at Mocha. All foreign coins pass current, and as coffee is always paid for in ready money, large quantities of various kinds of foreign coins are to be met with. The custom house weights are vakias, rattles, maunds, and frazis, thus divided:

15 vak as....	}	make	{1 rattle	lbs. oz. dwts. gr.
2 rattles....				.. 1 maund, weighs	2 0 16 23
10 maunds...			1 frazil.....	20 6 4 0
40 frazils....			1 bahar.....	814 to 816 lbs.

They reckon $11\frac{1}{2}$ vakias to a rattle, and 2 rattles to a maund in coffee, and to all other goods, 15 vakias to a rattle; but of all sorts of merchandise whatever (excepting jagger, dates, candles, and iron, of which 16 vakias make a rattle,) 10 maunds are a frazil, and 40 frazils a bahar. The rattle is only used in the bahar. The weights are seldom exact, though annually rectified by the Imam's shroff.

BENCOOLEN.

Coins, Weights, and Measures.

Accounts are kept in Spanish dollars, termed piastres. The coins current here are double and single fanams, rupees, and Spanish dollars:

2 single fanams....	}	make	{1 double fanam
6 double fanams....			1 rupee
2 rupees.....			1 Spanish dollar.

The Spanish dollar is always valued at five shillings sterling in the accounts on the Coast of Sumatra.

WEIGHTS.—The Chinese pecul is in common use in the bazar; but most commodities are weighed with English weights. The bazar here is 550 lbs. avoirdupois.

MEASURES.—The coyang dry measure is 800 bamboos, each bamboo about an English gallon.

BINTANG.

Coins, Weights, and Measures.

The Spanish dollar is the principal coin. China cash pass current in small payments. All goods are bought and sold by the Chinese pecul and catty, and all bargains are made for Spanish dollars.

BOMBAY.

COINS.—Accounts are kept at Bombay in rupees, quarters and reas. The following is a list of the current coins, with their sterling value, estimating the Bombay rupee at 2s. 6d. sterling.

		£. s. d. q. dec.			
2 reas	} make	1 urdee	0	0	0 00
4 reas		1 doogany, or single pice	0	0	0 1 20
6 reas, or 3 urdees		1 dotcea	0	0	0 1 80
8 reas, or 4 urdees		1 fudea, or double pice	0	0	0 2 40
3½ fudeas, or pice		1 anna	0	0	1 3 50
12½ pice, or 4 annas		1 quarter rupee	0	6	7 2
25 pice, or 8 annas		1 half rupee	0	1	3
50 pice, or 16 annas		1 rupee	0	2	6
5 rupees		1 pauchea	0	12	6
3 paucheas, or 15 rupees		1 gold mohar	1	17	6

Remarks on the Coins of Bombay.

SILVER.—The old Bombay rupee is the same as was coined at Surat under the Mogul Government. It weighed 178.314 grains, and contained 1.24 per cent. of alloy. By an ancient agreement with the Nabob of Surat, the rupee of both Governments was to circulate through both at an equal value; while they mutually pledged themselves to keep up the coin to its exact standard of weight and fineness. The Nabob, however, did not keep to this agreement; for his rupees were found soon afterwards to contain, instead of 1.24 per cent. of alloy, no less than 10.12, and even 15 per cent. The consequence of this was, that all the Bombay rupees were carried to Surat to be recoinced. This mint was entirely stopped in its silver coinage for more than twenty years, and the circulation of silver was occupied by the Surat rupee.

In this situation of things the merchants could not afford to coin their bullion here, and therefore Bombay was long without a silver coinage of its own; when Government in 1800 ordered the Surat rupee to be struck to this mint, and since that time the rupee has been kept at an equal value in both mints. In both the silver rupee weighs 179 grains, and contains 7.97 per cent. of alloy.

GOLD.—In the year 1774 the gold mohur was made of the same weight as the silver rupee. It was ordered to be of the fineness of a venetian, and to pass for 15 silver rupees. In this coinage, therefore, 14.9 grains of silver represented one grain of gold, for such is the proportion between the quantity of gold in this gold mohur, and the silver in 15 old Bombay rupees. When the Surat silver currency had occupied the circulation, this proportion between gold and silver was quite destroyed; so that gold coined according to the regulation of 1774, was now exchanged for no more than thirteen times its weight in silver, and often for much less.

In order to remedy this, and to bring back the coins of gold and silver to nearly their ancient proportions, and their relative value in the market, it was ordered in 1800, that the gold mohur should be of the same weight as the silver rupee, that it should contain the same quantity of alloy, and that it should pass for 15 rupees. At present, therefore, in the Bombay coins, 15 grains of silver represent one of gold.

Coins of gold have never circulated as a coin, either at Surat, or in the Mahratta states on this side of India. They are occasionally carried to those parts, but it is only as bullion.

The following table was drawn from actual assays; the first column contains the alloy in 100 parts of each of the different coins; the second column contains their weight in grains. From these two columns the value of the whole of the coins may easily and with perfect accuracy be ascertained.

SILVER COINS.

			Standard or Alloy p. cent.	Weight in Grains.
British standard of silver coin 8.1	
Spanish do lar A. D. 1790 10	—416
Old Spanish 4 real piece 8.99	
New German crown 12.19	
Bombay rupee 2.15	—173.32
Goa pardoe 6	
Pondicherry rupee 3.41	
Bassorah Cux 54.3	—280
Sutanny half rupee 7	
Cananore fanam 8.8	—35.66
Old fanam coined at the presidency 2.8	—35.66
Madras Rajapour 5.82	—174.05

Calicut fanams	40.50	
Saik Sai (a Mahratta gold coin)	16.43	166.57
Gold mohur of the Surat impression now current	7.97	179

WEIGHTS.—The English weights being in common use here, and at all the other Presidencies, the following account of their relative proportions may be found useful.

The two principal weights established in Great Britain are the avoirdupois and troy weights; the last is again divided into diamond and money weights; the grain is understood to be a grain of wheat, gathered in the middle of the ear:

AVOIRDUPOIS WEIGHT.

3 scruple	} make	1 dram
16 drams		1 ounce
16 ounces		1 pound
28 pounds		1 quarter
4 quarters		1 cwt.
20 cwt.		1 ton

Comparison between troy and avoirdupois.

175 troy lbs.	} make	144 avoirdupois lbs.
175 troy ounces		192 avoirdupois oz.
1 troy lb.		57.6 grains
1 avoirdupois lb.		7000 grains
1 avoirdupois oz.		437½ grains
1 troy oz.		480 grains

the avoirdupois oz. is near $\frac{1}{12}$ less than the troy ounce.

TROY WEIGHTS.

24 grains	} make	1 penny wt.
20 penny wts		1 ounce
12 ounces		1 pound

The moneyers have a peculiar subdivision of the grain troy thus:

24 blanks	} make	1 periot
20 pennies		1 droit
24 deniers		1 mite
20 mites		1 grain

DIAMOND WEIGHTS

Are carats, each carat being divided into 4 grains or 64 parts. The ounce troy contains 150 such carats; therefore this carat is $3\frac{1}{2}$ grains troy; hence 5 diamond grains are equal to 4 gold grains.

The other weights and measures in use at this Presidency are the undermentioned:

SILVER WEIGHTS.

6 chowes .	} make	1 goonze
2½ goonzes .		1 vail
40 vails .		1 tola, or rupee
2½ tolas .		1 seer

Silver is commonly sold from 96 to 100 single pice per tola, but computations in money are made by fudeas, or double pice.

LONG MEASURE.

18 inches .	} make	1 faut or cubit
24 inches .		1 guz.

The English yard of 36 inches is in common use.

N. B. Piece goods, and a few other articles are sold by the coze.

SALT MEASURE.

100 buckets }	} make	1 anra, or 2½ tons
16 annas }		1 rash 10 tons.

DRY MEASURE.

2 tiprees	} make	1 seer
4 seers		1 adowley
16 adowleys		1 parah
8 parahs		1 canoy.

These measures serve for wheat, and all kinds of grain, except rice or batty, which is sold by

BATTY MEASURE.

2 tiprees	} make	1 seer
7½ seers		1 adowley
20 adowleys		1 parah
6½ parahs		1 candy
25 parahs		1 moorah
4 candies	}	1 moorah,
A bag of rice weigh-		6 maunds, or 185
lbs and is Madras md.		6 5 30 4
A Bombay candy is ditto		22 3 8

The Bombay great weights are pice, seers, maunds, and candies, thus divided:

			lb.	oz.	drs.	dec.
30 pice.....	} make1 seer.....	avoidupois	0	14	14 93
40 seers.....	1 maund.....		28	0	0
20 maunds.....	1 candy.....		560	0	0

Although the above represent the common received standard of gross weights at Bombay, yet there are a great number of countries which are not governed by them, but sold by the Surra maund, which, notwithstanding it is said to contain only 40 seers, is sometimes 41, 42, 43, through all the intermediate gradations up to 46; nor is the candy uniformly confined to 20 maunds.

BORNEO TOWN.

Coins, Weights, and Measures.

Spanish dollars are the common coin, and China cash. The weights are the pical and cattay. The China kangash are used as a currency in the same manner as at Suoioo.

BUSHIRE.

Coins, Weights, and Measures.

Many of the European, and most of the Asiatic coins pass at the same rates as at Bussoerah; but the price fluctuates according to the quantity of the specie in the market.

Accounts are kept in flose, mamoodies, and tomands, 100 mamoodies making 1 tomand.

Pearls are sold by the abas, a weight equal to about $3\frac{1}{2}$ diamond grains, or 2,875 dec. gold grains.

BUSSORAH.

Coins, Weights, and Measures.

COINS.—Accounts are kept in flose, danims, mamoodies, and tomands, thus divided:

10 flose	}	make	{	1 dinim
10 danims				1 mamodie
100 mamoodies				1 tomand, value about 15 rupees.

Few of the coins current in Persia, are coined in the country. The consequence of this want of standard coins, and the introduction in their stead of foreign gold and silver, is a constant fluctuation in their value, so much so, that it is impossible to ascertain the value of gold coins for any length of time, and the Governors of the different districts frequently alter their standard value without assigning any reason. Excepting the Turkish piastre, and the tomand, all other coins are taken at a disadvantage.

The following is the value in mamoodies of some of the foreign coins in circulation here:

Gold mohur....	71 to 72	mamoodies	Spanish dollars	$7\frac{1}{2}$ to 8	mamoodies
Sequin.....	21 to $21\frac{1}{2}$	ditto	Leon dollars	$7\frac{1}{2}$ to 8	ditto
Fundunclee ..	21 to 22	ditto	Turkish piastre....	6	ditto
Zernehob.....	20 to 21	ditto	Bombay rupee	$3\frac{1}{2}$ to $3\frac{1}{2}$	ditto
Stambole.....	20 to 21	ditto	Persian rupee	5 to $3\frac{1}{2}$	ditto
Gingerlee	$11\frac{1}{2}$ to 15	ditto	Abassee	2 to $2\frac{1}{2}$	ditto.

WEIGHTS AND MEASURES.—The weight are vakias and maunds; the latter are of two sorts, ateree, and sophy.

24 vakias....	}	make1 mannd ateree, equal to avoirdupois	23 lbs.	8 oz.
76 ditto.....		1 ditto sophy	ditto	90 4
117 ditto.....		1 cutra	ditto	138 14

The maund sophy is equal to 1 Bengal factory maund, 8 seers, $5\frac{1}{2}$ chittacks; and the maund ateree to 15 seers $4\frac{1}{2}$ chittacks.

There are sundry allowances made on goods on delivery, beyond the above weights, viz.

26 vakias per maund,	for ginger, pepper, and coffee.
25 ditto.....	for cardamum, sugar candy, and benjamin.
24 ditto.....	for sugar, and all kinds of metals.

The maund for cotton is equal to 2 Surat maunds, and for indigo 3 Surat maunds 35 seers.

Gold and silver are weighed by the cheki of 100 miscal, each miscal $1\frac{1}{2}$ dram, or 72 grains troy. A miscal of the finest gold is worth about 22 mamoodies; a cheki of silver, or 150 drams, is worth about 150 mamoodies.

The oka of Bagdad is $2\frac{1}{2}$ vakias a'reee, and weighs 266 misca's, or about 400 drams.

The preceding is the mode of reduction of weights used by the Arabians; but the Europeans in Bussorah reckon the manna sophy to consist of 3 m units a'reee, and 25 vakias a'reee equal to 1 maund a'reee. The rattle is $14\frac{1}{2}$ vakias a'reee.

The guz, or cubit, is about 37 English inches, 93 being equal to 100 English yards.

CACHAO.

Coins, Weights, and Measures.

COINS.—Cash are the only coins here, and are two sorts, large and small; 600 large and 1000 small cash are accounted 1 maradée. Accounts are kept in talas, mace, and caudateens, all of which are regulated by the price of the maradoes and copper cash.

The price of silver is always variable here, on account of its rising and falling according to the quantity brought in; by this the Chinese make considerable advantage. Sometimes they allow 25 maradoes for 1 bar of silver of 10 talas weight, and at others not more than 21. All the Mexico and Pillar dollars imported are run into bar silver, without any distinction; these bars should weigh 10 talas each. They frequently put alloy into them, so that they are seldom so good as the dollar silver; though in payments you are obliged to make them an allowance of 2 per cent. to make it then standard, as they call it.

10 talas weigh, with the 3 per cent. included.....	12	6	2 $\frac{2}{3}$
1 tale ditto ditto.....	1	4	14 $\frac{1}{3}$
Which is more than the China tale	0	0	9 $\frac{2}{3}$
			2 4

WEIGHTS.—All goods are weighed by the Chinese doctchin. The King's weights had out till 1824, to a pecul; but it is necessary that every person should have a true doctchin of his own.

MEASURES.—The Chinese covid and punta are in general use of measuring cloth.

CALCUTTA.

Coins, Weights, and Measures.

COINS.—Accounts are kept here in an imaginary coin, called sicca rupees, with its subdivisions, annas, and pice; 12 pice make one anna, 16 annas one rupee, and 16 rupees 1 gold mohur. To this currency must all the real specie be turned or reduced, before any sum can be regularly entered into a merchant's book.

The coins current are gold mohurs, with its subdivisions, halves and quarters; sicca rupees, halves and quarters; annas, pice, and half pice. The two last are of copper.

GOLD.—In 1766 the Bengal gold mohur weighed 179,66 grs. was of the fineness of 20 carats, and passed for 14 sicca rupees. The gold was here overvalued, for it passed in proportion to silver, as 169.45 to 1. In 1769 it was ordered that the Bengal gold mohur should weigh 190.773 grs. and in this coinage gold was valued to silver nearly as 119 to 1. And lastly, by Regulation 33, Anno 1795, it was directed that the nine,

teen sun gold mohar should weigh 190.894 grs. and contain $\frac{3}{4}$ of a grain in 100 of alloy, and that it should pass for 16 nineteen sun sicca rupees. Here gold is valued in proportion to silver as 14.85 to 1, which is a small fraction less than gold bears to silver in the present coinage of Bombay.

SILVER.—The standard of the Benga money has ever been silver. Gold is occasionally coined, but the great bulk of the currency is silver.

The most common silver coin is the rupee of 1 sicca, or 10 massa weight, of the fineness of 11 oz 15 dwts. 4 grs. 8 dec. troy. The sicca weight is equal to 7 dwts. 18 grs. 55 dec. and is thus divided:

1 pie.....	}	make	is equal to troy weight, grs.....	9354
12 pie.....			1 anna dato.....	11,2219
16 annas.....			1 sicca rupee dit.....	179,5511
16 rupees.....			1 gold mohar dato.....	190,894

These rupees were formerly called sicca rupees, only during the year after their coinage, when the batta they bore on current rupees was 16 per cent; the second year, this was reduced to 13, and the third and following years the batta was 11 per cent; they were then called sonaut or sonat rupees. But with a view to abolish this distinction, all the rupees coined of late years by the East India Company have been dated the nineteen sun, that is the 19th year of the mogul's reign; and by Regulation 35, anno 1793, it is ordered that the nineteen sun sicca rupees shall be received as the legal coin of Bengal, Behar, and Oriza.

There are various other kinds of rupees to be met with in Bengal, whose fineness and weight are different, though their denominations are the same. From this, and from the natives frequently punching holes in the rupees, and filling up the vacancy with base metal, and their wilfully diminishing the weight of the coin after coming from the mint, the currencies of rupees from the different provinces are of different values. This defect has introduced a custom of employing shroffs or money-changers, whose business it is to set a value upon these different currencies, according to every circumstance, either in their favour, or their prejudices. When a sum of rupees is brought to one of these shroffs, he examines them piece by piece; and ranges them according to their fineness; then by their weight; he then allows for the different legal battas upon siccas and sonauts; and this done, he values in gross by the rupees current what the whole are worth; so that the rupee current is the only thing fixed, by which coin is valued.

Cowries are made use of for small payments in the bazar, and are generally thus reckoned:

4 cowries....	}	make	1 gunda
20 gundas.....			1 panna
4 panna.....			1 anna
4 annas.....			1 cabau, which is about $\frac{1}{4}$ of a rupee.

But they rise and fall according to the demand there is for them, and the quantity in the market.

Accounts are kept in lacs and crores. A lac is 100,000 and 1 crore is 100 lacs.

All rupees weigh, or ought to weigh, 10 massa weight; but they differ in fineness and touch, so that the coin of one province varies in another more than the intrinsic value of the specie.

The following is a table of the different kind of rupees current at the presidency, with their relative value to each other.

CURRENT RUPEES COMPARED WITH OTHER RUPEES.

100 current rs. are equal to	{	sicca rupees.....	85	3	4	100 sicca rupees.....	}	are equal to current rs.	116	0	0

4 gundas, or 20		1 coorie or 1 corge.
1 particulars....		

CALICUT.

Coins, Weights, and Measures.

COINS.—The principal coins in circulation are tars, fanams, and rupees; but accounts are kept in rupees, quarters, and reas, as at Bombay.

16 tars or vis	make	1 fanam
5 fanams		1 rupee
3½ rupees		1 star pagoda
2½ rupees		1 Port-Novo pagoda
16 rupees		1 Bombay gold mohur.

WEIGHTS.—100 pools make 1 maund of 30 lbs., and 20 maunds 1 candy of 600 lbs, 24000 grains.

LONG MEASURE.—1 coid is 18 inches, and 1 guz is $29\frac{2}{5}$ inches. Timber is sometimes measured at Caicut by the covia and borel; 12 borels (when the timber is sawed, and 24 when unsawed) are 1 coid.

CAMBAY.

Coins, Weights, and Measures.

COINS.—Gold mohurs, ruppes, and pice are the current coins; for small change a specie of almond, called baadam, is used, in the same manner as cowries at Bengal. These almonds are imported from Persia, and the general rate is about 60 for a pice.

All foreign coins are taken according to weight, and their prices vary according to the demand.

WEIGHTS AND MEASURES.—The maund is 40 seers, and the seer 30 pice; the maund is equal to $37\frac{1}{2}$ avondupois, and varies according to the different kinds of goods bought or sold, viz.

Metal's of all kinds	40 seers to a maund	Myrh	41 seers to a maund
Elephant's tusk	40 ditto	Sugar	41 ditto
Spices of all kinds	42 ditto	Cinnamon	42 ditto
Coil'ce	42 ditto	Indigo	44 ditto

The long measures are the cubit, about 18 English inches, the guz of 28, and in the bazar $28\frac{1}{2}$ inches.

CANANORE.

Coins, Weights, and Measures.

All sorts of Indian coins pass current here; the weights and measures are the same as at Tellicherry.

CANTON.

Coins, Weights, and Measures.

COINS.—Accounts are kept in tale, mace, candareens, and cash, thus divided: 10 cash 1 candareen; 10 candareens 1 mace; 10 mace 1 tale.

There is but one kind of money made in China, which is called cash; it is of a base metal, cast, not coined, and very brittle; it is round, about the size of an English farthing, marked on one side with Chinese characters, rather raised at the edges, with a square hole in the middle. They are usually strung, 100 in a string; but they rise and fall according to the quantity in the market, varying from 750 to 1000 cash for a tale. Their chief use is in making small payments amongst the lower classes of the people.

Spanish dollars are the principal coin current, but other silver coins are occasionally met with. For small change they cut the coins into pieces, and weigh them, for which purpose every merchant carries scales and weights with them, put up

in small portable wooden cases; they are made somewhat after the plan of the English steelyards, and are called by the Chinese a *datchin*. For the purpose of cutting the silver, they have a pair of scissors; and some are so dexterous, that they will cut the quantity required, without having occasion to cut a second time. All dollars which pass through the Hong merchants' hands bear their stamp, or chop, so that by frequent exchanges, the dollars become soon mutilated, and are then cut up for small change, or melted into ingots. All duties are paid in *sycee* or pure silver.

In the East India Company's accounts the tale is reckoned at 6s. 8d. sterling, but its intrinsic value is according to the price paid for silver in London.

The following table shows the value of the tale when Spanish dollars are from 5s. 3d. to 6s. 6d. per ounce.

Price.			Value of a Tale.			Price.			Value of a Tale		
s.	d.		s.	d.	DEC.	s.	d.		s.	d.	DEC.

5	8		6	10	144	6	4		7	7	798
5	9		6	11	342	6	5		7	9	006
5	10		7	0	550	6	6		7	10	214

At China they divide things decimally, as in buying gold and silver, which is not considered as money, but merchandise, it is estimated by a hundredth part, and their touching needles (by which they try the fineness of gold and silver) are marked and numbered accordingly. The finest silver among them is 100 touch, called *sycee* that is without alloy. England silver standard is 11 oz. 2 dwts. fine, and 18 dwts. alloy, making pure silver 12 oz. The following table is calculated, supposing the China assay to be of equal goodness with the English, that is 100 touch, or *sycee*, and 12 ounces English.

English silver compared and adjusted with China silver, from $\frac{3}{4}$ to superfine, or 12 oz.

English Assay.		China Assay.		English Assay.		China Assay.		English Assay.		China Assay.

11	6 94	4 10	11 87	22 9	16 81	16 9	1 75				10

The Chinese will sometimes take silver several pennyweights under full fine for *sycee* silver, but generally one pennyweight; thus English silver of 11 oz. 19 dwts. and 1 dwt. alloy will pass for *sycee* silver.

WEIGHTS.—The great weights are the *pecul*, *catty* and *tale*, thus divided :

			lbs.	oz.	drs.	dec.
16 tales,	} make {	1 catty, or avoidupois.....	1	5	3	333
100 catties,		1 pecul, or ditto.....	133	5	5	333

All goods are weighed at China; likewise provision, as milk, fowls, hogs, &c.

In delivering a cargo, English weights and scales are used, and afterwards turned into China *peculs* and *catties*. If the weights and scales are brought from Canton, care should be taken that the beam is not longer on one side than the other; some of them have holes or notches at each end of the beam, by which they can, by hanging the scales in one or other, diminish or increase the weight considerably.

The weights are in general light, particularly those they sell by, as have been found by weighing tutenague, raw silk, &c. many of their *dotchius* are loaded in the pan; above all, it is particularly necessary to pay attention to the weighing man, who is very apt to jerk the scale down, or pull it to him before he cries the weight, and that often erroneous. If a person delivering a cargo, will take the trouble of putting in the weights himself and balancing the scales, the benefit that will be derived by the cargo turning out well, will be an ample compensation for his trouble.

SMALL WEIGHTS.—Gold and silver are also weighed by the *tale* and *catty*; 100 *tales* are reckoned to weigh 120 oz. 16 dwts. troy, which make the *tale* equal to 679 3 dec. troy.

The Chinese arithmetic is mechanical. To find the aggregate of numbers, a machine is in universal use with all description of people. By this machine, which is called a *swanpan*, arithmetical operations are rendered palpable. It consists of a frame of wood, about an inch deep, and of various sizes, from 4 to 12 inches long, by 2 to 6 broad, divided into two compartments by a bar down the middle; through this bar at right angles are inserted a number of parallel wires, and on each wire, in one compartment are five moveable balls, and in the other two. These wires may be considered as the ascending and descending power of a numeration table, proceeding in a ten-fold proportion; so that if a ball upon any of the wires in the larger compartment be placed against the middle bar, and called unity, or one, a ball on the next wire above it will represent ten; and one on the next, one hundred; so, also, a ball on the wire next below that expressing unity, will be one-tenth; the next lower, one hundredth; and the third, one thousandth part of an unit; and the balls on the corresponding wires in the smaller compartment will be five, fifty, five hundred, five tenths, five hundredths, five thousandths; the value or power of each of these, in the smaller division, being always five times as much as those in the larger. This system, from its apparent ease and simplicity, is much admired, but is subject to error; and a person commonly conversant with arithmetic, will make more progress, and be more correct, than the most skillful of the Chinese, with the *swanpan*.

MEASURES.—The long measure in use at Canton is called the *covid* or *cubit*, it is divided into ten *punts*, and is about $14\frac{1}{2}$ English inches. There are several measures answering to our foot.

Dec. French Lines. Eng. Inches.

The foot of the mathematical tribunal, is	147.7	or	13 $\frac{1}{2}$
The builder's foot, called <i>kongpu</i> , is	148.1	or	12 $\frac{7}{8}$
The tailor's and tradesmen's foot, is	150	or	13 $\frac{1}{2}$
The foot used by engineers, is	141.7	or	12 $\frac{6}{10}$

The li contains 180 fathoms, each of 10 feet, of the last-mentioned length, which make the li 1,897 English feet, and 192½ li measure a mean degree of the meridian nearly, but the European missionaries divide the degree into 200 li, each li 1,826 English feet.

CAPE TOWN.

Coins, Weights, and Measures.

COINS.—The accounts of the colony are kept in rix dollars, schillings, and stivers.

2 stivers	} make {	1 dubbeltjee
3 dubbeltjers		1 schilling
8 schillings		1 rix dollar.

The rix dollar is a paper currency, which rises in value according to the real or supposed scarcity of cash: the discount varying from 15 to 35 per cent. In all bargains it is necessary to state whether the payments are to be in specie, or in paper money. Bills on England, at a date not exceeding 30 days, are generally considered equal to cash, particularly Government Bills. The following are the rates at which foreign coins pass current.

Table of Specie, as regulated to be current at the Colony of the Cape of Good Hope.

	Schil.	Stiv.	£	s.	d.
Guinea	44	264	1	2	0
Dobloon 16 Spanish dollars..	960	960	4	0	0
J bannes, 8 ditto	80	480	2	0	0

Venetian scutlon	19	114	0	9	6
Gold mohr	75	450	1	17	6
Pagoda	16	96	0	8	0
S. schilling dollar	10	60	0	5	0
Rupia	5	30	0	2	6
Englisch shilling	2	12	0	1	0
Copper coin		2	0	0	2
PAPER MONEY					
Rix dollar	8	48	1	3	4
Dutch schilling	1	6	0	0	4½

The English weights and measures are in general use, except for wines; these are sold by the ann and leager, four of the former making one of the latter, which contains from 150 to 152 gallons.

CARWAR.

Coins, Weights, and Measures.

COINS.—Accounts are kept in pagodas, fanams, and pice. All bargains with the country merchants are made for Darwar pagodas, which are 36 fanams, or 48 imaginary jettats;—six cash, or pice, are reckoned a fanam in accounts, but they rise and fall in the bazar; one pice is six budgerjoks.

The Darwar pagoda always passes for $3\frac{1}{2}$ rupees.
 The venetian passes for 56 to 57 jettai, or 42 to $24\frac{1}{2}$ fanams.
 The gubber ditto 53 to 54 ditto.

The Darwar pagoda being coined in the province, is most esteemed by the natives, but the Ikeri pagoda is worn more; they are of the same fineness, but differ in form and weight, 40½ of these being equal to 42½ Darwar pagodas. Spanish dollars pass current here.

WEIGHTS.—One seer is near 8oz 19lwts. troy; 42 seers make 1 maund, and 20 maunds 1 candy, which makes the candy about 51½lbs. 14oz though it is commonly reckoned 52 lbs. avoirdupois.

MEASURE.—The long measure is the coid, equal to 18 English inches.

COCHIN.

Coins and Weights.

COINS.—Accounts are kept in rupees of 16 annas; these are considered of equal value to the Bombay rupees. Accounts are also kept in fanams, 20 of which are reckoned equal to a rupee.

Most Indian and other coins pass current here: Venetian sequins for 72 fanams; Dutch onecat ons 5; Spanish dollars 40; Dutchrix dollars 32; and Negaputnam pagodas 64 fanams.

WEIGHTS.—Gold and silver are weighed by the sicca weight; 1 sicca is equal to 31 fanams; 72 fanams are equal to 8 pagodas, or 1 donat weight; and 93 fanams are the weight of 10 sequins, or 3 sicca weight.

The great weight, the 10 maund, which is 27 lbs. 2½oz. avoirdupois, and the candy of 20 maunds, or 54½ to 55½ avoirdupois.

The Cochin candy is equal to 7 Bengal factory maunds, 11 seers, $2\frac{1}{2}$ chattacks.

COLUMBO.

Coins, Weights, and Measures.

COINS.—Accounts are kept in pice, fanams, and rix-dollars or elephant rupees, thus divided:

4 pice	} make {	1 fanam
12 fanams		1 rix dollar or rupee
63 ante		1 star pagoda.

The star pagoda varies from 59 to 61½ fanams in bills of exchange drawn on Madras. The civil servants and military officers receive two-thirds of their pay in bills at 45 fanams to a star pagoda, or $5\frac{1}{2}$ rupees: these are called accommodation bills. This has recently undergone some alteration.

The sicca rupee passes for 13 fanams either in specie, or bills. The Bombay rupee passes current for 17 fanams in exchange for bills, and for 18 in the bazar. The Spanish dollar varies from 37 to 39 fanams, according to the demand, 350 Arcot rupees are 400 Ceylon rupees, or 14 dollars, or 100½ at pagodas.

WEIGHTS AND MEASURES.—English weights are in common use, in receiving and delivering foreign goods: but for the produce of the island, the parahi measure of 16 $\frac{1}{2}$ inches long, 16 $\frac{1}{2}$ wide, and 5 $\frac{1}{2}$ deep, is used, the weight varying according to the articles.

Parahi of salt weighs	44 lbs.		Parahi of Pepper weighs	39 lbs.
Ditto of coffee.....	39		Ditto of cinnamon.....	39

The amaram contains 16 parahs to the northward among the Malabars, and $2\frac{1}{2}$ amarams to the south; but to the southward among the Hindoos, 8 parahs make 1 amaram.

The Dutch bahar, or candy, is 480 Dutch lbs. or 52 $\frac{1}{2}$ lbs. avoirdupois.

The long measure is the coid, equal to 18 English inches.

FAIFOE.

Coins, Weights, and Measures.

COINS.—The only currency of the country is a sort of cash made of tutenague, 600 making a quan, which is equivalent to 2 rupees, or 1 Spanish dollar; this is divided into 10 mace of 60 cash each, the whole strung up together, and divided by a knot at each mace. Tutenague you receive from the King in payment for goods, are always new, and may be paid away again with at any doubt of a deficiency; but in your dealings with the merchants, you are obliged to receive the cash old and mixed, which is very troublesome in disposing of, besides a loss of 6 or 7 per cent.

The King refines and runs all his silver into bars of 10 mals weight, with which he sometimes pays his troops at the rate of 20 quans each; but they never pass current, being sold at from 16 to 17 quans each.

WEIGHTS AND MEASURES.—The weights are exactly the same as in China, and all goods are weighed by the dochin. Only for sugars they allow, instead of 100, 150 catties to the pecul, though the Chinese in general receive 160 catties to a pecul. The measure is the coid, equal to about 15 English inches.

GOA.

Coins and Weights.

COINS.—Accounts are kept in pardos, tangas, vintinas, and budgerooks, but there are good and bad of each kind; 1 pardo is worth 4 good or bad tangas, 16 good vintinas, or 20 bad; the pardo is also divided into 240 good or 300 bad reas.

The current coins are, the St. Thome, a gold piece which passes for 1 good tanga; it weighs 53 $\frac{1}{2}$ grains troy, and is of the purity of 13 carats, and worth about 6s. 8d. sterling.

The silver coin is the pardo, which is of two sorts: the pardo xeraphim passes current for 5 good tangas each, about 7 $\frac{1}{2}$ d. sterling; and the common pardo for 4 tangas; the former has on one side a figure of St. Sebastian, and on the other a sheaf of arrows.

The budgerook is made of tin, having on one side a globe, and on the other 2 arrows crossed.

Spanish dollars, venetians, rupees, and all other foreign coins pass current here, but the price fluctuates according to the quantity in the market.

WEIGHTS.—The quintal of 4 arobas is in common use, but they have the Indian candy thus divided :

			lh.	oz.	drs.
1 rattle	} make	{ is equal to avoirdupois	1	0	8
24 ratties		{ 1 maund	24	12	0
20 maunds		{ 1 candy	435	0	0

GOMBROON.

Coins, Weights, and Measures.

COINS.—Accounts are kept in shahees, an imaginary coin, and for which all bargains are made; the returns for goods, allowing 7 or 8 per cent. for the exchange, are generally made in abassees. All coins pass current here, Spanish dollars, rupees, venetians, French crowns, &c.

10 coz or pice	} make	{	1 shahee
2 shahees			1 mamoody
2 mamoodies			1 aba-see
2 abassees			1 Surat rupee
28 shahees			1 venetian
16 shahees			1 Spanish dollar
200 shahees			1 tomand.

Abassees and sequins are the common coins; of the latter there are several kinds, of which the venetians are the best in India by 2 per cent. When a parcel of venetian ducats are mixed with others, the whole go by the name of sequins; but when separate, one sort is called venetian, and all the rest indifferently by the name of gubbers.

WEIGHTS AND MEASURES.—The larger weights are of different sorts, and vary according to the names of the commodities sold.

The maund tabrees is $6\frac{3}{4}$ lbs. in the factory, but only $6\frac{1}{2}$ lbs. in the bazar; by this weight, sugar, copper, tutenague, and all kinds of drugs are sold.

The maund copra is $7\frac{3}{4}$ lbs. at the custom-house, but in the bazar from $7\frac{1}{4}$ to $7\frac{1}{2}$ lbs. by this weight, rice, almonds, raisins, and other eatables are sold.

The maund shaw is likewise in use, being 2 maunds tabrees, and equal to $13\frac{1}{2}$ lbs. avoirdupois.

The weight for gold and silver, is the miscal; $2\frac{1}{2}$ miscals are equal to a Surat tola, and 200 is 1 maund tabrees. By this weight, all valuable commodities are weighed.

The long measure is the guz, 93 of which are considered equal to 100 English yards.

ISLE OF FRANCE.

The currency of the island are Spanish dollars, the exchange of which with Madras is fixed at $16\frac{2}{3}$ Spanish dollars for 10 pagodas, each pagoda 45 fanams. The dollar is worth 200 colonial sous; the component parts bear a relative value.

JAPAN.

Coins, Weights, and Measures.

COINS.—Accounts are kept in tales, mace, and candareens; 10 candareens make one mace, and 10 mace 1 tale. The gold coins current are the new and old itjib, and cobangs or kohangs; the silver coins are the nandiogin, itaganne, and kodama. They are in general very simple, struck plain and unadorned, the greater part of them without any rim round the margin, and most of them without any determined value. For this reason they are always weighed by the merchants, who put their chop or stamp upon them, to signify that the coin is standard weight, and unadulterated.

The new cobangs are oblong, rounded at the ends, and flat, about two inches long, and rather more than 2 inches broad, scarcely thicker than an English farthing, of a pale yellow colour, the die on one side consists of several cross lines stamped, and at both ends there is a parallelogrammical figure with raised letters on it, and besides, a moonlike figure, with a flower on it in relief. On the other side is a circular stamp with raised letters on it, and within the margin towards one end, two smaller sunk stamps with raised letters, which are different on each cobang; these are valued at 60 mace, or rix dollars. There are old cobangs occasionally met with, which are of fine gold, somewhat broader than the new, and are worth 10 rix dollars.

The itjib is called by the Dutch golden bean, and is made of pale gold, of a parallelogrammical figure, and flat, rather thicker than a farthing, with many raised letters on one side, and two figures or flowers in relief on the other; the value of this is one-fourth of a cobang. There are old itjibs also to be met with; these are thicker than the new ones, and in value 22 mace 5 candareens.

Nandiogin is a parallelogrammical flat silver coin, of twice the thickness of a halfpenny, one inch long, and half an inch broad, and formed of fine silver. The edge is stamped with stars, and within the edges are raised dots. One side is marked all over with raised letters, and the other on its lower and larger moiety is filled with raised letters, and at the same time exhibits a double moonlike figure. Its value is 7 mace 5 candareens.

Itaganne and kodama are denominations by which various lumps of silver, without form or fashion, are known, which are neither of the same size, shape, or value. The former of these, however, are oblong, and the latter roundish, for the most part thick, but sometimes, though seldom, flat. These pass in trade, but are always weighed in payment from one individual to another, and have a dull leaden appearance.

Seni is a denomination applied to pieces of copper, brass, and iron coin, which bear a near resemblance to our farthings. They differ in size, value, and external appearance, but are always cast, and have square hole in the middle, by means of which they may be strung together; and likewise have always broad edges. Of these are current, sjumon seni, which pass for half a mace, or 10 common seni. Simoni seni, of the value of four common seni, are made of brass, and are almost as broad as a half penny, but thin. The common seni are the size of a farthing, and made of red copper; 60 of them make a mace. Doosa seni, is a cast iron coin, in appearance like the last, of the same size and value, but so brittle, that it is easily broken by the hand, or breaks in pieces when let fall on the ground.

The seni are strung 100 at a time, or, as is most commonly the case, 96 on a rush. The coins in one of these parcels are seldom all of one sort, but generally consist of two, three, or more different kinds; in this case, the larger sorts are strung on first, and then follow the smaller; the number diminishing in proportion to the number of large pieces in the parcel, which are of greater value than the smaller.

WEIGHTS.—These are the candareen, mace, tale, catty and pecul, thus divided :

10 candareens....	} make	{	1 mace
10 mace....			1 tale
16 tales....			1 catty
100 catties....			1 pecul

The pecul is 125 Dutch pounds, which are equal to $133\frac{1}{2}$ lbs. avoirdupois.

MEASURES.—The revenues of Japan are estimated by two measures of rice, the man and kokf; the former contains 10,000 kokfs, each 3000 bales, or bags of rice.

The long measure is the inc, which is about 4 China cubits; and $2\frac{1}{2}$ Japanese leagues are computed to be about 1 Dutch league.

JAVA.'

Coins, Weights, and Measures.

COINS.—Accounts are kept in rix dollars, an imaginary coin, each 40 stivers; and each stiver 16 pennings; but the currency is doits, suvers, dubbeltjees, schillings, and rupees, thus divided :

4 doits.....	} make	{	1 stiver
$2\frac{1}{2}$ stivers....			1 dubbeltjee
3 dubbeltjees .			1 schilling
4 schillings....			1 rupee.

GOLD COINS.—The following are current at Java, with their sterling value, reckoning gold at the standard price of £ 3 17s, $10\frac{1}{2}$ d. per ounce, and the rates at which they pass current :

Milled Dutch ducat weighs $2,5\frac{1}{2}$ contains 52,8 grains pure gold, worth £0 9 4, passes for 132 stivers.

Old Japan Copang.... 11.9232,2.....ditto..... 2 1 $3\frac{1}{4}$, passes for 480 stivers.

New ditto..... 8.9 $\frac{1}{2}$ 131,5.....ditto..... 1 3 $9\frac{1}{4}$, passes for 238 stivers.

English guineas are sometimes to be met with: when new, they pass for about 240 stivers; but when old, only from 200 to 204, which are equal to about 17 shillings sterling.

East India mohur, or gold rupee passes for 480 stivers: its subdivisions in proportion.

Doubloon, or Portugal £3 12s. piece, passes for 16 Spanish dollars.

SILVER COINS.—The following are current at Java, and at the following rates :

Florin, or guilder, weighs 6 dwts. 18 grs. contains 145 grains of silver, worth 1s. 8d. passes for 20 stivers.

3 guilder piece, weighs 1 oz. 3 grs.435,7 ditto.....5s. 6d. passes for 60 stivers.

Duccatoon, milled, is the current coin of all the Company's settlements, and passes for 80 stivers.

Unmilled, or old ducatoon passes for 71 stivers.

The milled ducatoon, though it passes current at 90 stivers, is not in proportion to the other coins, worth more than 66 stivers; it weighs 1 oz. 23 grs. and contains of pure silver 471.6 grains.

Milled rupee, in the Company's accounts, is 24 stivers, but passes current for .. 30 stivers
Schillings are of two sorts; the one the same as in Holland, passes for .. 6 ditto
The new, which are called skip schillings, pass for..... 7½ ditto
Rix dollar, which is coined at Batavia 40 ditto

English and German crowns vary according to the demand and quantity,
from..... 60 to 63 ditto

Spanish dollars pass at 64 stivers; the half and quarter dollars in proportion.

The Bengal sicca rupee passes for 31½ stivers; taken in exchange for Spanish dollars at the rate of 2 sicca rupees and 1 stiver per dollar; the value being fixed at 31½ stivers; the half sicca rupee passes for 15¾ stivers.

The Surat and Arcot rupees are of equal value with that of Java, and pass current for 30 stivers; the half rupee of each sort passes for 15¾ stivers.

The American and Austrian dollars pass for 60 stivers, and the gold eagle for 10 Spanish dollars.

COPPER COINS—Dubbeltjees, which are of two kinds; the old passes current for 2 stivers, and the new for 2½ stivers. Doits, 10 of which make 1 dubbeltjee; there are also two doit pieces and half doits. These have all the Company's arms, and no others are taken. China cash are used in the bazar in purchasing small articles of provision.

WEIGHTS.—The Chinese weights, tales, catties, and peculs are those in common use.

16 tales	}	make	{	1 catty, which is considered 1¼ lb. Dutch.
100 catties				1 pecul
3 peculs				7 small bahar
4½ peculs				1 large bahar.

The pecul weighs 125 Dutch lbs, which are equal to 133½ lbs, avoirdupois weight; by these weights most articles of merchandise are bought and sold, but they require comparison with European weights.

Rice and other grain are sold by the royang and ganton; the royang should weigh, on the receipt in the warehouse, 3300 lbs. net, though it is received from the outports as 3,500 lbs. Dutch.

The Dutch weights in use at Java and its subordinates are the following:

32 ases	}	make	{	1 engle	}	make	{	24 small pennis	}	{	1 grain
20 engles				1 ounce				24 grains			1 gr. penn
16 ounces				1 lb.				12 groot pennis			1 mark
1000 ases				7417 grains troy				1000 Spanish doll.			fine silv.
1 lb. Dutch troy, is 15 oz. 16 dwts. 11 grs. Eng. troy.											109 marks 6 oz.
135 Dutch troy lbs. are 178 English troy lbs.								The mark is reckoned to be 8 troy ounces.			
								19 marks Dutch troy are 164 ounces standard gold.			

MEASURES.

1 measure is 5 gantons, 230 gantons are 1 last, 1 last is 46 measures.
1 leager of wine is 360 rands, each rand 10 murses, and a leager of arrack, is 396 rands.

1 awm of ale or wine is 9 rands.
1 eil is 27 English inches.

1 vorm of firewood is 225 feet long
and 4 feet high.
1 ell of stone is 10 inches long 7 broad,
and $2\frac{1}{2}$ thick.

JUDDA.

Coins and Weights.

COINS.—Accounts are kept in cruse and duanees, 40 of the latter making one of the former.

No money is coined here. Foreign coins of all denominations pass current. From the great influx of pilgrims, large quantities of small coins are in circulation, but they are never carried out of the country by Europeans.

List of Silver and Gold Coins at Judda, and what they commonly pass current for.

	Dollars.	oz.	dwt.	
Judda weight.....	100	87	4 250	cruse
German crowns.....	100	91	6 255	ditto
Razecus (Barbary).....	100	87	4 243	ditto
Lump silver, if good	100	87	4 250	ditto
Pistareens of Philip V.	100	87	4 225	ditto
Lion dollars.....	100	87	0 95 to 100	ditto
Pope's coins, per 100			125	ditto
Muscovy coins.....			150	ditto
Bar silver.....	100	87	4 250	ditto
Zelotins, per lot .. 100 dollars, 100 to 165				ditto
Venetians 100=22½ sicca rupees ..			4½	ditto
Stamboles			4½	ditto
Zermabobs.....			3½	ditto
Gingrees			3	ditto
Tarals			3	ditto
Gulbers 100 of which are 2½ per cent. less than that of venetians, or stamboles ..			4½	ditto
Ring gold, sold per vakia.....			40	ditto

The exchange at Judda fluctuates, but the general average may be taken at 22½ Judda cruse per hundred Spanish head dollars. The put and head 40 is as is esteemed here of the same value, although the polar is about 2 per cent better than the head. French crowns are 13 per cent. less, though of equal standard, by which you may gain an advantage in purchasing French crowns, or pillar dollars; but if possible, avoid taking any gold coins to India upon your own account.

A comparative View of the relative Value of Coins taken at Judda with Bombay.

100 Mexico dollars will mint.....	239 2 41	100 old abascees will mint.....	224 3 80
100 French crowns.....	239 0 59	100 new abascees.....	236 3 0
100 English crowns	239 2 74	100 estimoies	239 2 74
100 pillar dollars	241 3 33	100 old Seville estimates.....	242 3 70
100 German crowns.....	226 3 39	100 Peru, or cobh dollars ..	224 2 28
100 ducatoons	244 1 39	100 lion dollars	193 1 4

Should you wish to coin your silver, the above statement will be found pretty correct, exclusive of mintage, which amounts to about 4 per cent.; but if your ship is going to Madras and Bengal, it is better to sell your silver to the shroff, than to coin it. One hundred ounces of standard silver will bring 258½ or 259 Arcot rupees; and there being only 1 per cent. difference between Arcot and Madras rupees, makes it 7 per cent. better thus to sell to the shroffs, than coining it into Madras rupees.

From the above statement, it would be best, in making your sales, to fix both the price and value of your silver and gold coin (in cruse) with the merchant. In this be very exact, and observe that gold fluctuates more than silver all over India: it would be necessary, therefore, before you leave Calcutta, Madras, Bombay, or Suva, to have the price current of all kinds of coins, from the Shroffs, in the current rupee of the place; by this means you will know to a certainty what your coins will produce, and the best market for the sale of them: add to this, large sums are paid at Judda in gold, and a small error in calculation may amount to a considerable sum. And be guarded, upon the receipt of gold, not to suffer them to charge you 2 per cent. for what they call overweight; or if obliged to allow it, make your estimate of their relative value accordingly.

WEIGHTS.—Are vakias, rattles, maunds, frazi's, bahars, and are thus divided:

15 vakias	} make	1 rattle
2 rattles		1 maund
10 maunds		1 frazil
10 frazils		1 bahar.

But as all goods are weighed by the steelyards, after the Turkish manner, the European as well as the Turkey merchants, are obliged to rest contented with such weights as the weigher thinks proper to give them. No merchants are allowed to weigh goods, when bought or sold, at their houses.

JUNK CEYLON.

Coins and Weights.

COINS.—All kinds of Indian coins pass current here, but the preference is given to Spanish dollars. They have not the small cash in circulation as at Acheen and other places. They have certain pieces of tin, shaped like the under half of a coin, called poot, which are used on the island as money, weighing about three pounds; these are also their weights:

4 poots	} make	1 vis
10 vis		1 capin
8 capins		1 bahar,

which is equal to 6½ Bengal factory maunds. The China pecul is in use here, by which tin is generally sold, the price varying from 12 to 16 Spanish dollars per pecul.

LÔHEIA.

Coins, Weights, and Measures.

COINS.—The only money is a small piece of base and adulterated silver, about the size of a six-pence, called commasse, and by this all different denominations of foreign

coins are ascertained. There are likewise half commassees, which are the smallest coin current.

1 venetian sequin passes for....90 com-	1 Barbary sequin passes for....80 com-
massees	massees
1 fundunclee.....50 ditto	1 dollar, or patack.....40 ditto

When the Indian merchants or vessels are here, the fundunclee is raised 3 commassees more; but all specie is scarce, notwithstanding the quantity brought hither in dollars, which is the coin in which all purchases are made. When it is necessary to change dollars, the shroff, or broker, only allows 39 instead of 40 commassees, so that there is a loss on the exchange of $2\frac{1}{2}$ per cent.

WEIGHTS AND MEASURES.—The weights are the dram, ounces, rottolo, and quintal. Their proportions are as follow:

10 drams	} make {	1 ounce
16 ounces		1 rotto o
100 rottolos		1 quintal.

The rottolos are of two sorts, one of 140 drams, which is used in selling fine goods; the other of 160, which is used in weighing sugar, lead, and other heavy articles. There is also another weight, called the faranzula, equal to 20 rottolos.

The long measure is the peck of 27 inches.

MACASSAR.

Coins and Weights.

COINS.—Accounts are kept in rix dollars and stivers. Spanish dollars are the common coin, but the under-mentioned also pass current at the following rates:

Duccatoons.....13 schillings	Bombay rupees.....5 schillings
English crowns10 ditto	Madras rupees.....4 ditto.

The exchange is 4 rix dollars for 3 Spanish dollars. All bargains are made in the former, which is a nominal coin. They have a kind of mace, 7 of which go to a dollar.

WEIGHTS.—All merchandize is weighed by the dotchin, and then reduced to other weights. Pepper is sold by the ganton, of which 225 make a Banda bahar; there are 2 gantons, 20 of the smaller making one of the larger. The quoyan of rice is 40 great gansons, each 90 lbs. which make the quoyan 3,600 lbs.; 20 small gantons are equal to a China pecul. Tortoise-shell is purchased by the bahar of 200 catties, weighed by the dotchin.

MADEIRA.

Coins, Weights, and Measures.

COINS.—Accounts are kept in reas and milreas, which are imaginary coins; the latter is 1000 reas, and equivalent to 5s. 6d. sterling. The coins current on the island are,

Spanish dollars pass for...	1000 reas, equal to	10 bits
Pistareens.....	200	2 do.
Half pistareens, or bits....	100	1 do.
Quarter pistareens.....	50	1 do.

The gold coins of Portugal do not pass current on the island.

The copper coins are pieces of 5, 10, and 20 reas, being the $\frac{1}{20}$, $\frac{1}{10}$ and $\frac{1}{5}$ parts of the pistareen.

WEIGHTS AND MEASURES.—Those of Portugal are in general use on the island. The Portuguese commercial pound is equal to 1 lb. $3\frac{1}{2}$ drams avoirdupois; the 100 lbs. of Portugal is 101 lbs. 3 oz. $3\frac{1}{2}$ drams avoirdupois.

COMMERCIAL WEIGHTS.		LIQUID MEASURES.	
72 grains of wheat	} make	2 meys	} make
2 ounces		4 quartillos	
4 ounces		6 canadas	
6 quills		2 pices	
32 grains		25 almudes	
4 arobas		2 pipes	
10½ quintals		18 almudes	

LONG MEASURE.—There are two principal measures, the vara and the covado; the former is five palms or pans, and the latter three. The palm is eight Portuguese, nearly nine English inches; the covado being $26\frac{1}{2}$ English inches.

MADRAS.

Coins, Weights, and Measures.

COINS.—Accounts are kept at this Presidency in star pagodas, fanams and cash; 60 cash make 1 fanam, but the number of fanams in a pagoda varies from 42 to 46. The Indian and European merchants keep their accounts at 12 fanams to a rupee, and 42 fanams to a star pagoda; but the natives keep theirs at 12 fanams 60 cash to a rupee, and 44 fanams 50 cash to a pagoda. In the bazar the pagoda fluctuates from 44 to 46 fanams.

The current coins are pagodas of various kinds, the arcot rupee, single and double fanams, and copper coins of 20, 10, 5, and 1 cash each, thus divided:

5 cash.....	} make	$\frac{1}{2}$ doodee
10 cash.....		1 doodee
20 cash or 2 doodees		1 pice
8 doodees.....		1 single fanam
4 pice.....		1 single fanam
2 single fanams....		1 double fanam
12 single or 6 double ditto.....		
24 single or 12 double ditto.....		1 rupee
$3\frac{1}{2}$ rupees		$3\frac{1}{2}$ rupees
		1 star pagoda

GOLD COINS.—The current or star pagoda, coined at this Presidency, weighs 6 Jwts. $2\frac{1}{2}$ grains, is 3 carats worse than standard, and its value at the standard price of gold £3 17s. 10½d. per ounce, is 7s. 5½d.

In the Company's accounts 100 star pagodas are valued at 425 current rupees.

The Madras or 3 Swamy pagoda is 20 2-3ds carats fine, and 100 of them are equal to 110 star pagodas.

The old pagodas of Negapatam and Tuticorin are about the same weight and value as the star pagodas; but in the latter coinage of those pagodas, they are depreciated, being only $15\frac{1}{4}$ carats fine, and 104 of them are equal to 100 star pagodas.

The Porto Novo pagoda is only 17 3-4ths carats fine, and passes current 120 for 100 star pagodas.

The Canteria pagoda is of the same value as the Porto Novo, i. e. 120 are equal to 100 star pagodas.

The Pondicherry pagoda was originally considered equal in value to the star pagoda, but its standard has been lowered to 17 carats, and even less.

The following is the relative value of the different kinds of pagodas and other coins current at Madras:

100 Madras pagodas	} make {	110 star pagodas
90 909 ditto		100 ditto
100 star pagodas....		120 Porto Novo do.
83. 333 ditto		100 ditto
350 Arcot rupees...		100 star ditto
49½ Madras fanams..		1 Madras ditto
35 do. 54,58 cash..		1 Canteria ditto
16 cash		1 ditto fanam
10 Canteria fanams		1 ditto pagoda
6 ditto pagodas...		1 star pagoda
45 Madras fanams..		5 ditto
37½ ditto		1 Porto Novo do.
30 Shooly ditto....		1 star pagoda
16½ Coilly ditto		1 ditto
46 do. 29,68 ditto ..		1 Bahauder do.
1 star pagoda		97 dec of 1 do.
1 star pagoda		1,26 dec. 1 Canteria ditto
8 ditto		weigh 1 Spanisk Dollar.

The fineness of gold and silver is expressed by dividing it into 10 touch, or matt, which are sub-divided into 10 parts, answering to the Chinese division of 100 touch.

SILVER COINS.—A new coinage has recently taken place of double rupees, single rupees, halves, quarters, and pieces of 1, 2, 3, and 5 fanams each, from Spanish dollars, which are estimated at 8 dwts. worse than the British standard.

lb. oz. dwts. grs.		lb. oz. dwts. grs.
1 new rupee will weigh of		
dollar silver,...	0 0 7 18½ troy, and contains pure silver ..	0 0 6 22½
1,000 ditto	32 4 19 7¾ ditto.....	28 10 16 18½

which is the same quantity of pure silver as is contained in the Arcot rupees that have always been issued from the Madras mint.

£ double rupee will weigh of

dollar silver,....	0	0	15	13 $\frac{1}{4}$	& contains pure silver.....	0	0	13	20 $\frac{1}{2}$
100 ditto.....	46	8	18	14 $\frac{1}{4}$	ditto.....	57	9	12	3
1 half ditto.....	0	0	3	21 $\frac{3}{4}$	ditto.....	0	0	3	11 $\frac{3}{4}$
1,000 ditto.....	16	2	9	15 $\frac{3}{4}$	ditto.....	14	5	8	63
1 quarter ditto..	0	0	1	22 $\frac{1}{4}$	ditto.....	0	0	1	17 $\frac{1}{4}$
1,000 ditto.....	8	1	4	19 $\frac{3}{4}$	ditto.....	7	2	14	53

The smaller coins are inscribed with their denomination in English, Persian, Goutco, and Malabar.

5 fanams piece weighs.....	71 $\frac{1}{2}$	grains troy
3 ditto.....	42 $\frac{3}{4}$	ditto
2 ditto.....	28 $\frac{1}{2}$	ditto
1 ditto.....	14 $\frac{1}{2}$	ditto

A silver coinage of half and quarter pagodas, of dollar silver fineness has likewise taken place.

1 silver half pagoda weighs.....	326 $\frac{1}{2}$	grains troy, & is equal to 1 $\frac{1}{2}$ Arcot rupee.
1 quarter ditto.....	163 $\frac{1}{2}$	ditto $\frac{1}{2}$ ditto

These coins are considered not only as the currency of Madras, but of all the subordinate territories.

The following is the relative value of the Madras or Arcot rupees, with other rupees current in India.

100 Arcot rupees are	{	sicca rupees....	93	1	8	{	100 sicca rupees	{	Arcot rupees	107	6	6
		Bombay	93	2	11		100 Bombay			101	13	7
		sonauts	97	4	9		100 sonaut			102	12	5
		current.....	108	0	0		100 current			92	9	6

Formerly the exchange between gold, silver, and copper at this Presidency was subject to great fluctuation. The shroffs, or money-changers, have recently proposed to Government that they would change the larger coins current at the following rates, viz.

For every pagoda to give	44	fanams	70	cash
For every half pagoda	22	ditto	35	ditto
For every quarter pagoda	11	ditto	17 $\frac{1}{2}$	ditto
For every rupee	12	ditto	65	ditto
For every half rupee	6	ditto	32 $\frac{1}{2}$	ditto;

and they are supplied at the treasury with fanams and copper coins to carry the same into effect.

COPPER COINS.—Great inconvenience having been experienced from the want of a proper copper coinage in the districts under the Presidency of Madras, a new one has recently been issued of the following numbers, weights, values, and relative proportions to the country weights.

The dubs are to be received and paid in all public payments at the following rates: 24 double dubs, 48 single dubs, 96 half dubs, or 192 quarter dubs to a rupee. They weigh as follow:

Double dubs	11,000	to the Madras candy of 50lbs avoirdupois
Single ditto	22,000	ditto
Half ditto	44,000	ditto
Quarter ditto	88,000	ditto
Single dubs	1,100	ditto to the maund of 25lbs.
Ditto	$137\frac{1}{2}$	ditto vis of $3\frac{1}{2}$ ditto
Ditto	$68\frac{1}{2}$	ditto padalum, or $\frac{1}{2}$ vis
Ditto	$34\frac{1}{2}$	ditto yabalum, or $\frac{1}{4}$ vis
Ditto	$17\frac{1}{4}$	ditto pump, or $\frac{1}{8}$ vis

When the above copper coins are issued, they measure with the star pagodas and fanam as follows:

84 double, 168 single, 336 halves, or 672 quarter dubs to one pagoda.

229 $\frac{1}{2}$ regulating ditto to one ditto, whose denominations are inscribed on them.

3 single dubs and 1 regulating dub are equal to 1 fanam
 6 half ditto and 1 ditto 1 ditto
 12 quarter ditto and one ditto 1 ditto

There are also issued the following coins, with their denominations inscribed on them in English, Persian, Geotuo, and Malabar.

40 cash piece being 293 grains or $23\frac{1}{2}\frac{4}{9}\frac{6}{8}$ to the pound avoirdupois
 20 ditto..... 149 ditto $46\frac{1}{4}\frac{4}{9}$ ditto
 10 ditto..... $74\frac{1}{2}$ ditto $93\frac{1}{4}\frac{4}{9}$ ditto
 5 ditto..... $37\frac{1}{2}$ ditto $187\frac{1}{4}\frac{4}{9}$ ditto
 $2\frac{1}{2}$ ditto $18\frac{1}{2}$ ditto $375\frac{1}{4}\frac{4}{9}$ ditto

WEIGHTS—Are the pagoda, pollam, seer, vis, maund, and candy, thus divided:

		lbs.	oz.
10 pagoda	} make	1 polam, is....avoirdupois	0 14
8 pollams....		1 seer	0 10
5 seers		1 vis	3 2
8 vis		1 maund	25 0
20 maunds....		1 candy	520 0

Gold sold by the current pagoda weight, poising each pagoda 2 dwts. $4\frac{1}{2}$ gra. troy.

The following is a comparative view of the several denominations of great weights used in various parts of India, with those of the Presidency of Madras:

MADRAS WEIGHT.

Country,	Species of Weights.	maunds.	vis.	pol.
Bengal	factory maund	2	7	$35\frac{1}{2}$
Ditto.....	bazar maund	3	2	$11\frac{1}{2}$
Bombay	candy of 20 maunds....	22	3	8
China	pecul of 100 catties.....	5	2	20
Mocha ...	babar of 15 frazils.....	17	6	16

Surat	candy of 20 maunds.....	29	6	37½
Jamkceylon	bahar of 8 capins	19	3	12½
Bencoolen	bahar	22	3	8
Calicut	maund of 1000 pools	1	1	24
Cochin	candy of 20 maunds	21	5	36½
Malacca	bahar of 3 peculs	16	1	2½
Tellicherry	candy of 20 maunds	24	0	0

GRAIN AND DRY MEASURE—Are the olluck, measure, marcal, parah, and garce thus divided :

1 olluck	} make	{ is equal to . cubic inches	11,719 dec.
8 ollucks			93,752
8 measures			750
5 marcals			3,750
400 marcals . . .			300,000

The marcal and lesser measures were ordered, when made of wood, to be round, and rimmed with iron or brass, and the marcal to be $9\frac{1}{8}$ inches deep, and $10\frac{1}{4}$ inches diameter inside, and to hold 27lbs. 2 ounces, and 2 drams avoirdupois, of fresh well water : hence 43 marcals are equal to 15 English bushels. The parah to measure 2 feet square, and $6\frac{1}{2}$ feet deep.

When grain is sold by weight, 9,256½lbs. equal to 18 candies ; 12½ maunds are a garce, which is nearly 17½ English quarters.

LIQUID MEASURE—The puddy, by which milk, ghee, oil, and some other liquids are sold, is equal to the puddy in grain measure, containing 8 ollucks ; but for wine, spirits, &c. the English measure is used.

1 olluck.....	}	make	{	is English measure, gall.	0	0	0	1½		
2½ ollucks				ditto	0	0	1	0	
5 ollucks				ditto	0	1	0	0	
8 ollucks				1 measure, or puddy	0	1	1	4½	
2½ measures				or 20 ollucks	1	1	1	4½	
8 measures	}		{	1 marcal	3	0	1	0
20 maunds.....				1 candy	64	0	0	0

LAND MEASURE—Land is generally measured with a Gunter's chain of 100 links, or with a rod of 10 feet, and reduced to cawnies, grounds, and square feet, agreeably to the following table.

60 feet long, and 40 feet broad, make 1 ground or mauney, equal to 2,400 square feet
 24 grounds or maunies make..... 1 cawney 57,600 ditto.

The Indian cawney is in proportion to the English acre, as 1 is to 1,3223 or as 121 is to 160.

To reduce Indian cawnies to English acres, multiply the given number of cawnies by 160, and divide by 121 ; the quotient will be the number of acres, and the remainder the fractional parts of an acre. Or multiply the cawnies by 1,3223, and the product, cutting off 4 places to the right hand, will be the same, and the figures so cut off, are the decimal parts of an acre.

LONG MEASURE—The covd in cloth measure is 18 inches ; but the English yard is generally used.

MAGINDANAO.

Coins.

COINS.—The currency in most parts of the country, as in Sooloo, is the Chinese kangao, a piece of coarse cloth, thinly woven, 19 inches broad and six yards long; the value at Sooloo is 10 dollars for a bundle of 25, sealed up, and at Magindanao much the same; but here Spanish dollars are scarce. These bundles are called gandang rolled up in cylindrical form. They have also as a currency consoogs, a kind of naokeeo, dyed black, and kompow, a strong white Chinese linen, made of flax.

To the bazar, or market, the immediate currency is paly; 10 gantangs, of about 4 lbs. each, make 1 battell, and 3 battells (a cylindrical measure $1\frac{1}{10}$ inches high, the same in diameter) about 120 lbs. are commonly sold for a kangao. Speaking of the value of things here and at Sooloo, they say such a horse, prua, &c. is worth so many slaves, the old valuation being one slave for 30 kangaos.

China Cash is in use here, their price from 160 to 180 for a kangao. In making bargains, it should be specified whether is meant real or nominal kangao: the dealing in the nominal or imaginary kangao is an ideal barrier. When dealing in real kangaos, they must be examined, and the gandang, or bundles of 25 pieces, are not to be trusted, as the dealers will often forge a seal, having first packed up damaged kangaos; at this the Chinese here and at Sooloo are very expert.

MALACCA:

Coins, Weights, and Measures.

COINS.—They have no particular coins of their own; some few Dutch schillings and stivers are to be seen; the rest are gold, as coupangs, ducats, &c.; but all contracts for goods, bought or sold, are made in Dutch dollars.

Accountants are kept in six dollars, schillings, stivers, and doits, which are thus divided:

4 doits	} make	1 stiver
6 stivers		1 schilling
8 schillings		1 rix dollar.

All Indian coins are current here. The following are the rates at which they usually pass:

Bombay rupee.....	5 schillings	} Japan coupang 80 schillings
Madras rupee	4 ditto	
Spanish dollar	10 ditto	
		Ducatoon 13 ditto
		English crown 10 ditto.

WEIGHTS AND MEASURES.—All goods are weighed here by the dotchin, for which 1 per cent. is paid to the Captain of the Chinese, who is dotchin keeper.

GREAT WEIGHTS.		
16 tales	} make	1 catt
100 catties		1 pecul
3 peculs		1 bahar

GOLD WEIGHTS.		
16 miams	} make	1 buncal
20 buncals		1 catty
which is equal to troy, 22 oz. 16 dwts.		

GRAIN MEASURE.—1 ganton is equal to 6 Dutch lbs.; 10 gantons 1 measure; 50 measures 1 last; 800 gantons 1 quoyau. 40 China peculs are 1 quoyau, and 1 pecul is 125 Malacca lbs.

LONG MEASURE.—The covid is two-thirds of a Dutch ell, about $18\frac{2}{3}$ English inches.

MALDIVES.

Coins.

Their money is of silver only, called larins, and the value about a quarter of a rupee each. All other monies pass current by weight, and every man keeps weighs for the purpose, so that they are frequently obliged to cut dollars, rupees, &c. into pieces to pay for any commodity.

MANGALORE.

Coins, Weights, and Measures.

COINS.—The following are the coins in common currency here, and their value in rupees, viz.

Ikeri or Swamy pagoda	4 rupees	Madras or star pagoda ..	3½ rupees
Bahadary or Hyder's pagoda	4 ditto	Porto Novo ditto	3 ditto
Sultany or Tippoo's ditto	4 ditto	Canter Raya or Ikeri fanam ..	½ ditto
Kristna or Mysore ditto ...	4 ditto	Vir Rnya fanam	¼ ditto

Of silver coins, the Surat and Madras rupees are considered of equal value, and pass for $5\frac{1}{2}$ silver fanams, the same as are current in Malabar; in the bazar they exchange for 10 dudos or dub-, but in revenue are taken for 14 dubs each.

Of copper coins, the Bombay pice coined in England, and Tippees's dubs are current here; these with their fractions $\frac{1}{2}$, $\frac{1}{4}$, and $\frac{1}{8}$ are the only small coins in use. Cowries are not in circulation.

In payment for goods or debts, every person must receive these coins at the above rate of exchange. The money changers give silver for gold at the regulated price; but they take a small batta, or exchange, when they give gold for silver. They also give copper for silver at the regulated price, but demand $10\frac{1}{2}$ dubs for the silver fanam.

Accounts are commonly kept in Sultany pagodas, rupees and annas; others are kept in pagodas, a nominal fanam of 10 to a pagoda, and annas, or 16 parts of these fanams.

WEIGHTS.—The seer used for weighing, contains 4297 grains, which is rather more than 24 Bombay rupees. The seer is divided into halves, quarters, eighths, and sixteenths. The number of seers in the maund varies according to the goods to be disposed of.

The maund by which goods are sold in the market is 46
seer, or lbs. 28,14

The maund by which the merchants purchase, and by which the Company buy and sell, weighs 16 rupees more or	28,55
Jaggery is bought and sold by the maund of 40 seers	24,47

The candy contains 20 maunds, and varies accordingly, from 571 lbs. to 589½ lbs.

MEASURES.—The seer in the bazar is formed by mixing equal quantities of salt, and of the nine most common grains, and then by taking of the mixture 48 Bombay rupees weight; this fills the seer measure, and is about 73,633 dec. cubical lucas. The moray contains 33 seers, or about 1½ bushel.

The grain measure, by which the farmers sell their crops, is thus formed: 64,125 cubical inches make 1 hany, 14 hanyes make 1 culisingay, 3 culisingays make 1 mudi or moray, which is about 1,2525 bushel.

Grain, salt, and sometimes pepper, are sold by measure; of this last a pukka seer, or 73,683 cubical inches, is reckoned to weigh 51½ Bombay rupees. The corgé for rice is 49 morays.

MONTE VIDEO.

Coins, Weights, and Measures.

COINS.—Accounts are kept in pesos of 8 reals, subdivided into 16 parts, and also into 34 maravedi. The gold coins are doubloons of 8 escudos, with halves and quarters in the same proportion. The silver coins are dollars, or pesos, Mexicanos of 8 reals, with halves and quarters, eighth (or reals), and sixteenth in the same proportion.

WEIGHTS.—The quintal is divided into 4 arobas of 25 lbs. each; the pound into 2 marks, or 16 ounces; the ounce into 8 drams, 16 adarmes, or 576 grains. Merchants commonly reckon 100 lbs. equal to 102 lbs. avoirdupois, but the exact proportion is 123 to 125.

MEASURES.—The Spanish foot is 11½ English inches; it is divided into 12 palmadas, each 12 lines. The fanega is a measure for corn, &c. containing 12 celemin; and 5 fanegas, one English quarter.

M O S A M B I Q U E.

Coins and Weights.

COINS.—The coins current are Spanish dollars, crusados, and testoons, 4 testoons making 1 crusado, the exchange of which with Spanish dollars varies from 250 to 270 crusados per 100 dollars.

WEIGHTS.—The weights are the frazil, and the bahar, 20 of the former making one of the latter, which is considered equal to 240 avoirdupois pounds.

MUDDI.

Coins, Weights, and Measures.

COINS.—The only coin belonging to the place, is of silver, called a cowrie. The exchange varies from 285 to 295 cowries per 100 Bombay, or Surat rupees. All Indian coins pass current here. Their value fluctuates according to the quantity in the market.

WEIGHTS.—The weights are seers and maunds, the latter of two sorts, Cutch and Pucca.

2 pice	}	make	{	1 anna
16 annas				1 Cutch seer
40 seers				1 Cutch maund, avoirdupois $37\frac{1}{2}$ lbs.

The Pucca maund is 2 Cutch maunds, and 20 Cutch maunds are equal to 1 Surat candy.

MEASURES.—The measures are the grah and the guz, 16 grahs making 1 guz, about 34 English inches. Broad cloth, velvets, silks, &c. are sold by this measure, though the shopkeepers in the bazar often sell by hand, from the finger's end to the elbow, &c. This is rejected by the merchants.

MUSCAT.

Coins and Weights.

COINS.—Accounts are kept here in gass and mamoodies; 20 gass make 1 mamody. The coins current are:

30 budgerooks	}	make	{	1 mamody
$3\frac{1}{2}$ mamoodies				1 Bombay rupee
$7\frac{1}{2}$ ditto				1 Spanish dollar.

All Persian, Turkish, and Indian coins are met with here but are generally sold by weight.

WEIGHTS—The weights are the cucha and maund; 24 cucas making a maund which is equal to 8 lbs. 12 oz. avoirdupois.

NATAL ON SUMATRA.

Coins and Weights.

Spanish dollars and rupees are current; besides these are single, double, and treble, fanams, the latter called tali, coined at Madras; 24 fanams or tali, being equal to a Spanish dollar. English and Chinese weights are in common use.

In this part of the island, where the traffic in gold is considerable, it is generally employed as currency instead of coin. Every man carries small scales about him, and purchases are made with it so low as a grain or two of paddy weight. Various seeds are used as gold weights, but more especially two, the one the well-known scarlet pea with a black spot, 24 of which make a mace, and 16 mace a tale. The other is a scarlet, or rather coral bean, much larger than the former, and without a black spot. It is the candareen weight of the Chinese, of which 100 make a tale. The tale differs in the northern and southern parts of the island; here it is only 24 dwts. 9 grs. troy; but at Pad-

NEGAPATAM.

Coins.

During the period the Dutch held Negapatam, a coinage took place of four or five lac of pagodas annually; but this has been discontinued since the English obtained possession of it. As there is no gold coinage in any other place to the southward, nor any regular circulation of rupees, the whole currency of those provinces, exceeding the pagodas that happen to be in use, consists of fanams. Of these every district coins a different sort, and no comparative rate having been established between the sea pagodas and those inferior coins, their value fluctuates according to the relative demand, and the coinage of one province is seldom at par in another.

COINAGE.

ONORE.

Coins, Weights, and Measures.

COINS.—The common currency here consists of Ikeri, Sultany, and Bahadary pagodas; Surat and Madras rupees, which are considered of equal value; fanams, a small silver coin; and dubs, a copper coin.

10 dubs.....	} make	{ 1 fanam.
5½ fanams.		
½ rupees.....		

WEIGHTS.—The seer weight is the same as at Mangalore; it ought to weigh 24 Bombay rupees, but these being scarce, in their stead dubs are commonly used, and are somewhat heavier.

The number of seers contained in the maund, varies according to goods sold, viz,

Common articles in the bazar are	40	seers or	avoir, lbs.	24,55
Pepper	42	26,91
Beetle-nut	45½	27,92
Dry cocoa-nut kernels	45	29,46
Jaggery	44	26,82

MEASURES —There are two kinds of grain measures in use, one for the farmers, and one for the merchants; the basis of the former is the haau, containing 87½ cubical inches.

16 banies	} make	{ 1 colaga, which is equivalent to bushels	0,816
20 colagas			1,632
22½ colagas			1,813
15 colagas			1,224

The basis of the measure by which the merchants deal, is the sida of 32½ cubical inches.

6 sidas	} make	{ 1 colaga	bushels	0,907
20 colagas			1 moray	1,814
30 morays			1 corge	54,419

The bazar moray, and that of the farmers for sale, ought to be the same, but they differ a little.

PADANG.

Coins and Weights.

COINS.—Accounts are kept in rix dollars and stivers; 48 stivers making 1 rix dollar. Spanish dollars and most of the Indian coins pass, nearly at the same rates as at Batavia.

WEIGHTS.—Both Dutch and Chinese weights are in common use.

PALEMBANG.

Coins and Weights.

COINS.—The currency of the country, and the only money allowed to be received at the King's treasury, is Spanish dollars; but there is also in general circulation a species of small base coin, called petis, which are cut out of plates composed of lead and tin; and having a square hole in the middle, like the Chinese cash, are strung in parcels of 500 each, 16 of which are equivalent to a Spanish dollar. Accounts are kept in rix dollars (a nominal coin) and stivers; the exchange between Spanish and rix dollars being five of the latter for four of the former.

WEIGHTS.—Here, as well as at all other places where the Chinese have settled, their weights have become in common use. In weighing gold, the tale is considered as the tenth part of the catty, or equal to the weight of $2\frac{1}{4}$ Spanish dollars.

The commercial weights are gantons, baly, and copangs; 10 gantons make 1 baly, about 60 catties; and 80 balies 1 copang; by this measure, rice is also sold.

PASSIER.

Coins and Weights.

Spanish dollars are the general coin, and goods are bought and sold by the China pecul and catty

PATANY.

Coins and Weights.

The principal coin is the Spanish dollar, and all goods are weighed by the Chinese doctchin.

PEDIR.

Coins and Weights.

Spanish dollars are the principal currency; the other coins are nearly similar to those at Acheeu. The Pedir catty weighs 37 Spanish dollars, and the bahar is equal to 424 lbs, avoirdupois.

PLETTEMBERG BAY.

Coins.

The Cape paper money passes current here; and Spanish dollars vary from 11 to 12½ schillings paper currency, each.

PONDICHERRY.

Coins, Weights, and Measures.

COINS—Accounts are kept in pagodas, fanams and cash; 60 cash making 1 fanam, and 24 fanams 1 pagoda. The coins current are pagodas, rupees, and fanams, also copper cash or dudos, thus divided:

$$\begin{array}{l} 20 \text{ dudos} \\ 24 \text{ fanams} \end{array} \left. \vphantom{\begin{array}{l} 20 \\ 24 \end{array}} \right\} \text{make} \left\{ \begin{array}{l} 1 \text{ fanam} \\ 1 \text{ pagoda} \end{array} \right.$$

There are various kinds of pagodas current here, and are nearly all of the same weight. That of Pondicherry was originally equal in value to the star pagoda; but its standard has been considerably lowered; it passes for 3½ rupees, though the exchange varies from 350 to 360 rupees per 100 Pondicherry pagodas. The exchange for Spanish dollars is from 210 to 215 rupees per 100 Spanish dollars.

WEIGHTS—Gold and silver are weighed by the seer, pagoda, rupee and fanam; a seer weighs 28½ rupees, 8¼ pagodas, or 73¼ fanams; a rupee weight is equal to 30 fanam, or 420 nellos; a pagoda weight is 9 fanams, or 144 nellos; thus 3 rupees are equal in weight to 10 pagodas.

71½ pagodas weigh a French mark, or 3778 English grains, so that the seer contains 4295 grains.

The commercial weights are the candy of 20 maunds, each maund 8 vis. The Pondicherry maund is 25lbs 14oz. 5drs. avoirdupois.

MEASURES—Rice, and all other sorts of grain are sold by the garce of 600 marcal; and 100 marcal are nearly 18 English bushels.

PONTIANA.

Coins and Weights.

Spanish dollars are the principal coin; and the China weights of pecul and catty are in common use.

PORTO NOVO.

Coins.

Accounts are kept in collums of paddy, or in chuckrums. The collum is a measure which is between 70 and 80 quarts, but varies in different parts. The medium price of a collum of paddy is 3½ gold, or 7 silver fanams, about 1s. 4d. sterling; so that 100,000 collums of paddy at the afore-mentioned price, will produce 15,555 Star pagodas, 25 fanams.

In the Tanjore country the star pagoda is valued at 45 Madras, or silver fanams; 1 chuckrum is equal to 20 Madras, or 10 gold fanams; 2 chuckrums and 1 fanam is equal to 1 Porto Novo pagoda.

The Porto Novo pagoda passes current at Madras for $37\frac{1}{2}$ Madras fanams, 100 Porto Novo pagodas are reckoned 83 $\frac{1}{2}$ star pagodas, and 100 star pagodas, equal to 120 Porto Novo pagodas. In the Company's accounts the Porto Novo pagoda is reckoned at 36 fanams.

PRINCE OF WALES'S ISLAND.

Coins, Weights, and Measures.

COINS—Accounts are kept by the Company in Spanish dollars, copangs and pice; 10 pice making 1 copang, and 10 copangs 1 Spanish dollar.

The merchants keep their accounts in Spanish dollars and cents. The current pice are coined on the island, being pieces of tin, nearly the size of an English penny; they have the Company's mark on one side, and are flat on the other; 100 of them ought to contain $4\frac{1}{2}$ catties of pure tin.

WEIGHTS AND MEASURES—Weighable goods in the wholesale are chiefly sold by the China pecul; they are weighed with English weights, and afterwards turned into peculs and catties.

The English yard is in common use, and piece-goods are bought and sold by the corg.

QUEDA.

Coins and Weights.

Spanish dollars are the principal coin. All goods are weighed by the China dotchin, or wooden steel-yard; but English scales and weights are in common use. The bahar is 424 lbs. avoirdupois.

RANGOON.

Coins, Weights, and Measures.

COINS.—The Birmans, like the Chinese, have no coin; silver is bullion, and lead, are the current monies of the country; weight and purity are of course the standard of value, and in the ascertainment of both, the natives are exceedingly scrupulous and expert.

What foreigners call a tical, or tackal, properly kiat, is the most general piece of silver in circulation; it weighs 10 dwts. 10 grs. 75 dec. and is thus divided:

2 tubbees....	}	make	1 moo
2 moos.....			1 math
4 maths.....			1 tical
100 ticals.....			1 vis.

Money scales and weights are all fabricated at the capital, where they are stamped and afterwards circulated throughout the empire; the use of any others is prohibited.

The bankers, called by foreigners *Pyaons*, are likewise workers in silver, and assayers of metal. This class of people is very numerous, and indispensably necessary, as no stranger can undertake either to pay or receive money without having it first examined. Every merchant has a banker of this description, with whom he deposits all his cash, and who, for receiving and paying, gets an established commission of 1 per cent; in consideration of which, he is responsible for the quality of what goes through his hands, and a breach of trust is very seldom heard of.

The quantity of alloy varies in the silver current in different parts of the empire. At Rangoon it is adulterated 25 per cent. In pure, or what is called flowered silver, all royal dues are paid. The several modifications are as follow:

Rouni.....	or pure silver	} make	Rouassee.....	or 20 per cent. alloy
Rounika.....	or 5 per cent. alloy		Moowadzo.....	or 25 ditto
Rounizee....	or 10 ditto		Woombo.....	or 30 ditto

Any person may have his silver either purified or depreciated to whatever standard he chuses. The nearest silversmith will perform the work free from charge; as the bringer by the operation must lose a trifle, which the artist gains; the small quantity of metal that adheres to the crucible being his profit.

WEIGHTS AND MEASURES.—The weights are the moo, tual, vis, and candy, and are thus divided:

100 moos....	} make	1 tual
100 tual.....		1 vis
150 vis.....		1 candy.

The vis is considered equal to 3lbs. 5oz. 5drs. 33dec. and the candy to 500lbs. avoirdupois.

Rice is sold by a measure called *tayndaung*, or basket; the weight is 16 vis, about 56lbs. The average price of rice at Rangoon is about 4 or 5 bakets for a tual.

The measures of length are the *paulgant*, or inch, 18 of which compose the *tain*, or cubit. The *saundaung*, or royal cubit, is equal to 22 inches, but varies according to the will of the King.

The *dia*, or bamboo, consists of 7 royal cubits; 1000 dias make one *dain*, or Birman league, equal to 2 English miles, and 2 furlongs; the league is also subdivided into tenths.

The Birmans keep their accounts in decimals, after the manner of the Chinese.

RIO DE JANEIRO.

Coins, Weights, and Measures.

COINS.—Accounts are kept in milreas and reas, 1000 reas making a milrea. They separate the milreas from the reas thus—166,208, which is 166 milreas, 208 reas.

GOLD COINS.—The gold monies current, and the weight are as follow. The sterling value is estimated at the British standard of £3 17 10½ pence.

COINS.	WEIGHT.	Sterling value.	Current value.
No. of Reas.	oz. drs. grs.	£ s. d.	£ s. d.
Gold piece..... 25,600	1 16 12	7 2 1	7 4 0
5 Moldore piece or Dobrao 24,000	1 14 12	6 14 5	6 15 0
Doublon, or 2 Joaneses.... 12,800	0 18 6	3 11 0½	3 12 0
½ Dobrao..... 12,000	0 17 6	3 7 1½	3 7 6
½ Doublon or Joaneses.... 6,400	0 9 5	1 15 10	1 16 0
Moldore 4,800	0 6 22	1 6 11	1 7 0
¼ Doublon or ½ Joaneses.. 3,200	0 4 15	0 17 11½	0 18 0
Gold piece.... ¼ Joaneses.. 1,600	0 2 6	0 8 8½	0 9 0
½ Moldore 1,200	0 1 16½	0 6 6½	0 6 9

SILVER COINS.—The following are the current silver coins, with their weights, and sterling value estimated at the British standard price of 5s. 2d. per ounce.

COINS.	WEIGHT.	
No. of Reas.	oz. drs. grs.	Sterling value.
Patacao or Sello..... 640	0 11 12	0 2 9½
Crusado..... 480	0 9 9	0 2 3½
¾ Patacao 320	0 5 18	0 1 5
¾ Crusado, or 12 Vintem piece 240	0 4 16	0 1 2
½ Patacao, 8 ditto 160	0 2 21	0 0 8½
6 Vintem piece 120	0 2 4½	0 0 6½
4 ditto 80	0 1 13	0 0 4½
3 ditto 60	0 1 2½	0 0 3½

The Spanish dollar passes current here; when received by the Portuguese from a foreigner, it is seldom taken for more than 720 to 750 reas, but when paid by them, is estimated at 800 reas.

The Portuguese silver coins are in general 7 to 9 dwts. worse than British standard.

COPPER COINS—Are the piece of 20 reas, or 1 vintem, and the half and quarter vintem in proportion; most of the Portuguese coins have on one side the arms of Portugal, and on the other an armillary sphere.

WEIGHTS—Are about 1 per cent. heavier than avoirdupois; 95lbs. 80dec. being equal to 100lbs. avoirdupois, and are thus divided:

2 drams.....	} make {	1 octave
8 octaves....		1 ounce
16 ounces....		1 pound
32 pounds....		1 arroba
4 arrobas ...		1 quintal
13½ quintals ...		1 ton

The ounce is divided into octaves, scruples, and grains. Diamonds are weighed by carats of 4 grains; the Portuguese ounce is 139½ such carats, each carat equal to 3¾ grains English troy.

MEASURES.—The long measures are the covada and vara; the latter is 5 spans and the covada 3; the span is near 9 inches, so that the covada is about 27 inches English.

The measure for corn, salt and other dry commodities, is thus divided :

2 outavas....	}	make	{	1 quarto
2 quartos....				1 meyo
2 meyos.				1 alquiere
4 alquieres...				1 fanega

The alquiere measures 817 cubic inches, and 50 alquieres make 19 English bushels.

The liquid measure is thus divided :

4 cuartillos....	}	make	{	1 canada
12 canalias....				1 a mude
18 almudes....				1 barrel
26 almudes....				1 pipa
2 pipas.....				1 tonelada

The almude is reckoned equal to $4\frac{1}{2}$ English gallons.

ST. HELENA.

Coins, Weights and Measures.

COINS.—Accounts are kept in pounds, shillings and pence ; but coins of every denomination pass current here, both Indian and European.

Port Novo pagodas used to pass at the same rate as star pagodas, notwithstanding they are inferior ; but Government having made an alteration, they only pass current at 7s. 6d. Guineas are generally at a premium, likewise bank notes ; passengers returning to England preferring to put up with the loss here to that in England, upon the sale of East India coins.

WEIGHTS AND MEASURES—All weighable commodities are bought and sold by avoirdupois weight, and the English yard is the common measure for cloth, linens, &c.

ST. SALVADOR.

Coins, Weights and Measures.

Are similar to those enumerated at Rio de Janeiro, to which St. Salvador is subordinate.

SALANGORE.

Coins and Weights.

Spanish dollars are in general use, but imaginary dollars are dealt for here, which are computed by weight in the following manner :—8 tompongs of tin of 8 catties weight, are 1 dollar ; 30 dollars, or 240 catties, are 1 bahar. The Malacca bahar of 300 catties is sometimes used for selling ; it is therefore necessary in bargains to men-

tion what bahar you agree for, and insist upon having your tin weighed by your own weights, as their docthin is generally short of the weight you ought to receive.

The bahar here is China Peculs, or 400lbs. avoirdupois.

SAMBASS.

Coins and Weights.

The Chinese weights are in common use. Spanish dollars are the coin in which all bargains are made; but hercabouts wax is the currency of the country; it is melted, but not refined, and cast into moulds of an oblong shape, the breadth about two-thirds of the length, and the thickness about half the breadth, having a rattan to lift them by, cast in the wax. A piece weighs a quarter of a pecul, and is valued in payment at about 10 mace; for smaller payments they have pieces of eight and sixteen to a pecal; and for smaller money, cowries are in use.

SIAM.

Coins, Weights and Measures.

COINS.—Accounts are kept in tales, tical, miams, fouangs and cowries, thus divided:

800 cowries....	} make	{	1 fouang, called by the natives pbuani
2 f nangs....			1 miam, or mace
4 miams....			1 tical, or batt
4 ticals... ..			1 tale or tamuni.

10 miams are equal to a China tale, and Siam tales are always reckoned at 8 China tales.

The coins are gold ticals, which pass for 10 silver ticals; miams, fouangs and sampors. The silver tical weighs $225\frac{1}{2}$ grains, and is from 11 oz. 4 dwts. to 11 oz. 11 dwts. fine; thus it is worth £2 5s. to £2 6s. sterling; these coins are often adulterated. Two ticals pass commonly for a Spanish dollar, and $2\frac{1}{2}$ ticals for a Dutch ducatoon.

The fineness of gold and silver is expressed, as is in China by touches.

GREAT WEIGHTS are ticals, catties, and peculs, thus divided: 80 ticals make 1 catty, and 50 Siam catties should be equal to 1 China pecul of 133½ lbs. avoirdupois; for all their goods are weighed by the China docthin, but the King's weight at Siam is never found to give more than 129 lbs.

GOLD AND SILVER WEIGHTS are the tical, which weighs nearly 9 dwts. 20 grs.

MEASURES.—The largest measure for corn is the cochi, of 40 sestres; the seste contains 50 sats, and weighs 100 Siam catties.

The long measure is 2 soks make 1 ken, 2 kens 1 vovah, which make $75\frac{1}{2}$ English inches; 20 vovahs make 1 sen, and 100 sens 1 league, or roeneng, which is 4204 English yards.

SINKELL.

Coins and Weights.

Spanish dollars are the principal currency; but accounts are kept in tales, soocoos and satallies, viz.

4 satallies	}	make	{	1 sooccoo
4 sooccoos				1 tale
1 tale				4 Spanish dollars.

Benjamin is brought here by the tompong or cake, which ought to weigh 20 catties, each catty 56 ounces avoirdupois, and for camphire 56 ounces troy weight.

The Chinese pecul is in common use in buying and selling most commodities.

SOOLOO.

Coins, Weights, and Measures.

They have no coin at Sooloo, only a currency which they reckon by sanampoory, cangan, and cowsoong, or nankeen: the first is a term only, and the second a coarse China cotton cloth, which goes in payment of goods, and is reckoned equivalent to a Spanish dollar, a few of which are occasionally met with among them. In small payments they make use of paddy, or rice in the husk, which rises and falls according to the plenty or scarcity of grain. In their accounts they sometimes reckon by Spanish money, but commonly by the cangan and sanampoory, of which the following is the rate:

4 sanampoories	}	make	{	1 cangan of 6 fathoms long
4 sanaipoories				1 cowsoong of 4 fathoms long.

The cangan was formerly seven fathoms long; but as the Chinese suffered by impositions here, they have debased the manufacture, and contracted the measure, which example the native so well imitate, that it scarce happens a cangan is found six fathoms in length.

The use of paddy as a currency has introduced the custom of measuring instead of weighing grain and some other commodities, as cowries, &c.

WEIGHTS.—The Sooloo weights are similar to those of the Chinese; but they have given them other names, and they correspond with the latter, in the following manner:

10 moohonks..	}	make	{	1 choochock..	}	equal to	{	1 candareen
10 choochocks.				1 ammas				1 mace
10 ammas.....				1 tale.....				1 tale
16 tales.....				1 catty				1 catty
5 catties				1 booboot....				5 catties
10 booboots ...				1 lacksa.....				50 catties
2 lacksas				1 pecul.....				1 pecol

The weights in some of the islands are heavier than the standard; however, as an implicit confidence is not to be placed in their doctchins, it will be necessary to compare them with English weights.

MEASURES.—Their smallest grain measure is a half cocoa nut shell, called a panching.

$$\begin{array}{l} 8 \text{ panchings....} \\ 10 \text{ gantaogs.....} \\ 2\frac{1}{2} \text{ ragas.....} \end{array} \left. \vphantom{\begin{array}{l} 8 \\ 10 \\ 2\frac{1}{2} \end{array}} \right\} \text{make } \left\{ \begin{array}{l} 1 \text{ gantang} \\ 1 \text{ raga} \\ 1 \text{ pecul} \end{array} \right.$$

The gantang of rice is reckoned to weigh four catties, according to which $2\frac{1}{2}$ ragas make 1 China pecul of 133 $\frac{1}{2}$ lbs. and also 1 cawan of Manilla.

The measure for cloth, is the fathom, but the Chinese covid is in common use.

SUEZ.

Coins and Weights.

COINS.—The principal current coins are burbers, medine, sequins and Spanish dollars. The burber is a copper coin, 12 of which make a medine. The sequio is of two sorts, one called funduoclee, and passes current for 146 medines; the other zermabob, which passes for 110 medines. The asper, though not coined in Egypt, passes current here, 3 aspers making 1 medine.

4 grains make 1 kellat, 16 of which make a dram, of which all the weights are compounded.

1 $\frac{1}{2}$ dram is 1 metigal, by which gold and silver are weighed
 144 drams 1 rottolo, equal to 1 lb. 4 oz. avoirdupois
 400 ditto 1 oke, by which sugar and other heavy goods are weighed.

The quintal varies from 110 to 150 rottolos, according to the species of goods to be weighed.

SUCCADANA.

Coins and Weights.

COINS.—Spanish dollars are the only coin in circulation in their trade with Europeans, and all bargain are made in this money; but accounts among themselves are kept in tale and mace.

WEIGHTS.—All gross goods are weighed by English weights and then turned into Chioa peculs. Their small weights are busucks, kupangs, mace, pahaw and tale, thus divided:

$$\begin{array}{l} 2 \text{ busucks....} \\ 4 \text{ kupangs...} \\ 4 \text{ mace.....} \\ 4 \text{ pahaws ...} \end{array} \left. \vphantom{\begin{array}{l} 2 \\ 4 \\ 4 \\ 4 \end{array}} \right\} \text{make } \left\{ \begin{array}{l} 1 \text{ kupang} \\ 1 \text{ mace} \\ 1 \text{ pahaw} \\ 1 \text{ tale} \end{array} \right.$$

By these weights diamonds, gold, bezoar and other valuable articles are weighed.

SURAT.

Coins, Weights and Measures.

COINS.—Accounts are kept in rupees, quarters and reas, 400 reas making one rupee.

The coins current are the gold mohurs, rupees, their halves and quarters, and tin pice, 72 pice to 1 rupee. For small change they have baddams, a species of almond; these rise and fall according to the quantity in the market, and vary from 43 to 60 for a pice.

The gold mohur weighs 179 grains, and passes current for 15 silver rupees.

The silver rupee coined under the Mogul Government, weighed 178,314 grains, and contained 1,24 of alloy; but in consequence of the Surat coinage being so much depreciated, as to contain from 10 to 15 per cent. of alloy, in 1800, the Bombay Government ordered the Surat rupee to be struck in that mint, to weigh 179 grains, and to contain 7,87 per cent. alloy.

Bullion of all kinds is sold in proportion to its fineness, reckoning Mexico dollars the standard: this varies according to the rates of exchange.

100 ounces Mexico doll.	11 oz. 2 dwts.	fineness will produce from	243 to 246 rs.
100 ditto.. Ducatoons.	11 6½ditto.....	245 to 250 do.
100 ditto.. Old Seville.	11 5ditto.....	244 to 249 do.
100 ditto.. Pillar doll..	11 4ditto.....	242 to 248 do.
100 ditto.. French Crowns	11 1½ditto.....	235 to 245 do.
100 ditto.. Lion Dollars	8 19ditto.....	190 to 200 do.
Gold venetians, full wt. of vals	9½ditto.....	346 to 356 do.
Gubbers..... ditto.....ditto.....ditto.....	342 to 350 do.

Coins of gold are seldom circulated as coin at Surat, but generally considered as bullion.

WEIGHTS AND MEASURES.—The great weights are pice, seers, maunds, and candies, but English weights are in common use.

			Cwt.	qrs.	lb.	oz.	dwt.	dec.
20 great or 30 small pice	}	make	1 ser.	equal to avoird.	0	0	0	14 15 76
40 seers			1 maund.....	0	1	9	7	6 50
20 maunds			1 candy	6	2	21	4	2 0

The maund is considered equal to one half of the Calcutta factory maund. There is also a pukka maund, which is equal to the factory maund. Although the above is the common received standard of gross weight at Surat, yet most of the commodities in the market are sold by a different number of seers to the maund, varying from 40 to 46 seers; nor is the candy uniformly confined to 20 maunds. For example: pepper and sandal wood are sold by the Bombay candy of 21 maunds; and cotton, the great staple commodity of this country, by the Surat candy of 21 maunds. In the list of imports at Bombay is specified by what number of seers, &c. to a maund each article is sold.

PEARL WEIGHTS.

			dwt.	grs.	dec.
20 vassas	}	make	1 ruttee is troy.....	0	8 951
3 ruttees			1 val.....	0	5 853
24 ruttees.....			1 tank.....	1	15 344
30½ vals			1 Surat rupee.....	7	11 0
32 vals			1 tola.....	7	10 317
			oz.	dwt.	dec.
1 small Surat pice is troy	9	2	56	or avoirdupois.....	0 7 95
1 great ditto.....	13	15	895	ditto	0 11 953
1 Surat tola.....	7	19	317	ditto	0 6 556

1 miscal is 1 tank. 2 ruttees, 1 vaśa, and 33 tolas 25 vals is 100 miscalis.

47 tolas, 29 vals, 1 ruttee, of 50 Surat rupees, is troy 18 oz. 13 dwts. 23 grs. 61 dec.

1 seer of coral, or amber, is 18 great pice, $31\frac{1}{2}$ tolas, or 27 small pice, and weighs troy 12 oz. 293 dec. or avoirdupois 13 oz. 487 dec.

The Venetian sequin is $9\frac{1}{2}$ vals, and the Spanish dollar 73 vals.

The measures are the large coid of 36 inches, and the small coid of 21 inches. Broad cloth, satins, ve vets, &c. are generally sold by the English yard of 36 inches. The parah corn measure contains 29 paves, and weighs about $7\frac{1}{2}$ bs. avoirdupois.

TELLICHERRY.

Coins, Weights, and Measures.

COINS.—The coins current here are pagodas, rupees, fanams, pice, and tars. There are two kinds of fanams; the one is a silver gold coin, with a considerable alloy of silver and copper; the other a silver coin; the pice and tar are copper, coined in England.

2 tars	} make {	1 pice
10 pice		1 fanam
5 fanams..		1 Bombay rupee.

The following are the rates at which gold coins commonly pass current at Tellicherry.

Porto Novo pagodas.....	$3\frac{1}{2}$ rupees	Venetians, 5 rupees each; but if paid 52 rupees per 100 venetians.
Star pagodas.....	$3\frac{1}{2}$ ditto	
Suitany ditto.....	4 ditto	
but to pay for goods, 430 rupees per 100 pagodas.		Sur 1 gold mohurs....15 rupees each
		Bombay ditto.....16 ditto.

In selling goods, all bargains should be made for Bombay rupees, or you will lose considerably by the coins you are obliged to take here, more particularly the venetian which seldom fetch more than four rupees each at Bombay, and upon pagodas the loss is from a quarter to half a rupee each.

Accounts are kept in rupees, quarters, and reas, the same as at Bombay.

WEIGHTS.—The commercial weights are pollams, maunds, and candies, thus divided: 20 pollams make 1 maund, and 20 maunds 1 candy, which is reckoned equal to 600 lbs. avoirdupois; but the maund does not exceed $28\frac{1}{2}$ lbs. which makes the candy on y 570 lbs.

MEASURES.—The long measures are the coid, and the guz; the former 18 inches and the latter 28 inches.
